Technical audit

Benefits
Using ABB enables our clients to see the things that their organisation either does not know about or is blind to as a result of familiarity fatigue.

We provide
- Third party independence and objectivity
- Identify gaps versus regulatory requirements, company standards and procedures
- Clear understanding of status versus industry standards and engineering best practice
- Prioritised actions to drive improvement

Systems - Procedures - Competencies - Equipment

**ABB’s approach**

ABB’s auditing process is well established and is underpinned by tried and tested audit protocols aligned to the requirements of the relevant regulations and standards.

ABB has a group of experienced auditors, recognised experts in their particular field, with many years of experience of design, operation, maintenance and good engineering practice.

ABB audits for compliance with a range of regulations and standards including:

- PAS55
- MHSAWR
- PUWER
- PSSR
- Electricity at work
- ATEX / DSEAR
- LOLER
- Asbestos
- Pipeline safety

Audits are tailored as necessary to address the operational circumstances of our clients’ businesses.

ABB have conducted numerous technical audits for a wide range of clients.

“...The audits provided an independent view of our compliance. The audit programme identified where we need to improve across the sites in our group and where we can share good practice. ABB’s team interacted well with our site teams and provided practical guidance for improvement”

Group Engineering Manager
