COURSE DESCRIPTION

CHH653 – System 800xA Applications for Minerals Configuration and Operation Utilizing BMI Library

Course goal
The goal of this course is to learn the operation and configuration of the Extended Automation System 800xA with AC800M controllers and the Control Builder M tool utilizing the Minerals Library.

Main learning objectives
The participants will be able to:
— Monitor and control the BMI minerals process objects
— Navigate in the system and create new objects and aspects using Plant Explorer
— Use the standard libraries and the Minerals Library as well as create project specific libraries
— Design and configure applications using Control Diagram Editor (CDE) within CBM utilizing BMI Library
— Customize and use the operator’s workplace and its functions and operate the Minerals Library objects
— Configure process graphic displays and define navigation links
— Manage and configure events and alarms
— Use the import/export tool
— Backup and restore the System 800xA

Participant profile
This training is targeted to engineering, planning, advanced operating, commissioning, maintenance and service personnel working in the field of minerals applications.

Prerequisites
Participants should know the fundamentals of working with control systems and have basic knowledge of the Windows XP or Windows 7 operating system, 800xA configuration and programing and technical English.

Topics
— Operating minerals process objects
— Using Control Diagram Editor (CDE) for programming applications with functions, function blocks and control modules utilizing BMI Library
— Data types in BMI Library (e.g. AISData, DISData, GCC_ComData, PCC_ComData, etc.)
— Application programming utilizing various BMI Library control modules (e.g. Stw, PreSelection, Group/SubGroup, Mot1, MotP, AIS, DIS, GrpCycleCtrl, GroupConnect_2, GroupStep, PCC_Intlk LCC, etc.)
— Utilizing and understanding various BMI Library function blocks (e.g. PCC_Connect, PCC_Threshold_AND3, etc.)
— Monitoring event and alarm lists during operation and acknowledging alarms
— Operator workplace and process graphic (based on tabbed workplace) (optional)
— Import/export tool (optional)
— Backup and restore of the System 800xA (optional)
— Workshop engineering

Course type and methods
This is an instructor-led course with lectures, demonstrations, interactive discussions and practical exercises. At the end of the course a workshop is done. This workshop covers larger exercises consolidating the most important items from the training which the students will need for their future work.

Duration
The duration is 5 days.
