PRODUCT LIFE CYCLE STATUS STATEMENT

DriveMonitor 3000 Version

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Current life cycle status
The DriveMonitor 3000 is in the Obsolete life cycle phase according to the ABB life cycle management model outlined above.

Life cycle plan
The Obsolete life cycle phase represents the last life cycle phase of the ABB life cycle management model where no services are available.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time, the model ensures access to continuing support for our customers.
