P281 COURSE DESCRIPTION

MicroSCADA Pro SYS600 Operation

The aim of the course is to present how to supervise and control the power process with the MicroSCADA Pro SYS600 control system. Focus is on the application and its HSI (Human System Interface) built up by using the standard power process library.

Objectives

After this course the participant will be able to:
- Use the supervision and control functions of MicroSCADA Pro SYS600
- Select the settings of the displays to take advantage of many customization possibilities in the user interface.

Participant profile

System operators and engineers who want to become familiar with the MicroSCADA Pro SYS600 system.

Prerequisites

Basic knowledge of the process to be controlled and supervised. Basic ability to use personal computers.

Topics

- MicroSCADA Pro SYS600
- User interface Monitor Pro
- Process displays and control dialogs
- Measurements
- Event and alarm displays
- Trends and Measurement Reports display
- Blocking displays
