## Digital Services

Powerful digital solutions in a single portfolio

---

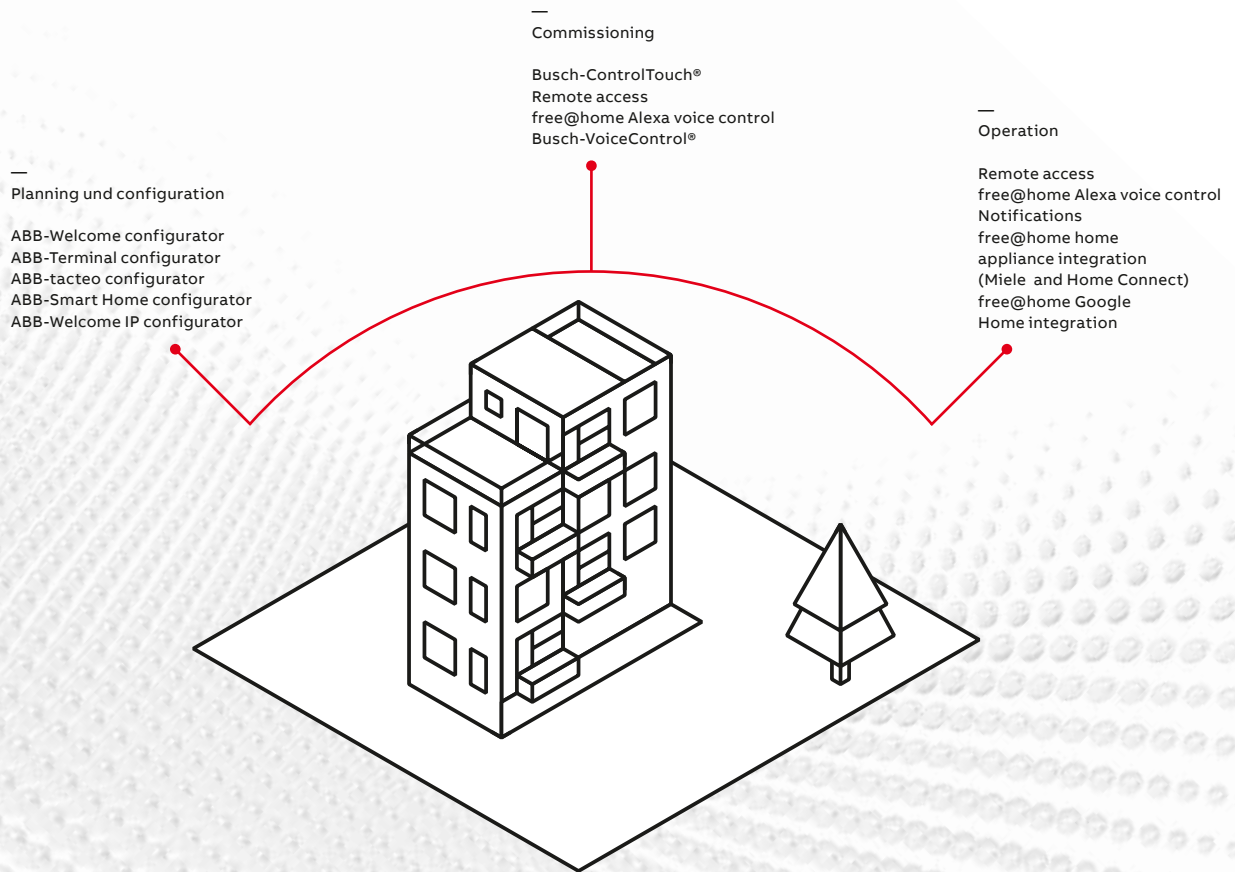

Shaping the future of the digital world today requires fully automated solutions that can be networked with all other intelligent devices.

### MyBuildings portal powered by ABB Ability™

Controlling and planning smart buildings is now easier than ever: ABB bundles its digital services for Smarter Home and Building in the MyBuildings portal (formerly my.abb-livingspace.com) under the ABB Ability™ umbrella. The online portal gives you access to many of ABB's tools and services that you can use for your individual needs. You have the option to configure KNX systems, fire alarm technology, door entry system or ABB-tacteo KNX as well as to extend system functionality with remote access or Amazon Alexa voice control. You can also connect your smart system to a mobile device.

## Digital Services

Plan, configure and modify as desired with the MyBuildings portal powered by ABB Ability™

A central contact point for Smarter Building services.

Global availability of ABB services.

24/7 monitoring for best worldwide availability.

Regular cyber security: audits and tests by independent third parties.

## Digital Services

Remote Access, Home Appliances Integration and Cloud-backup

### ABB-free@home

MyBuildings enables you to check on your ABB-free@home system from anywhere in the world. You can check the status, control functions, and you get notifications in case of events that you can define. All you need is a MyBuildings portal Account and a remote access subscription.

### ABB-Welcome

You can also open the door from anywhere in the world to let in the maid or the post delivery man. This way you won't miss a package one more time. All you need is the IP Gateway and a MyBuildings portal Account.

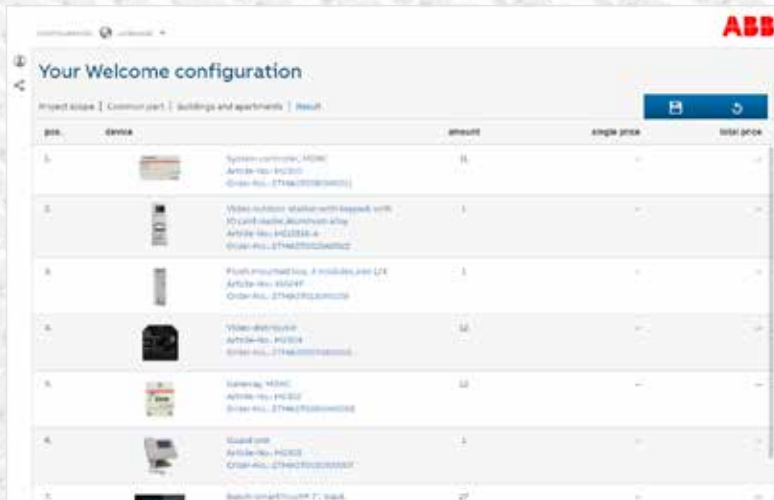

### Integration of Home Appliances

The MyBuildings portal allows the easy integration of Smart-Home-capable devices from Miele and Home Connect in ABB-free@home easily. All supported devices appear in the free@home app and the ABB-free@home panel and the main functions can be directly controlled via the wall-mounted pushbuttons.

## Digital Services

### Configuration and Commissioning

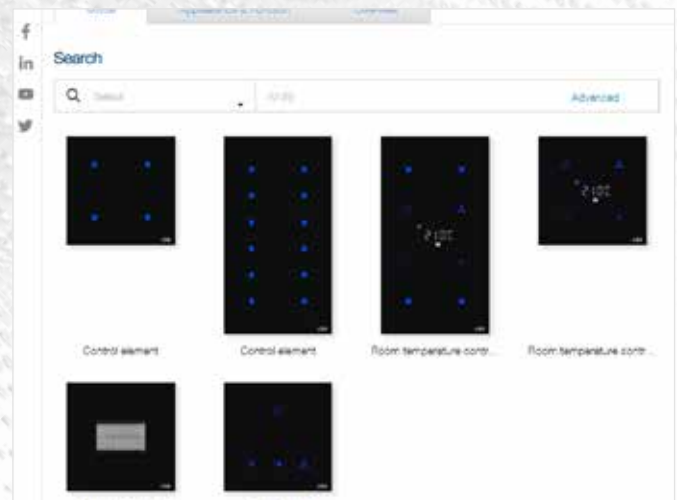

#### ABB-Welcome Configurator

Planning a door entry system for a residential compound with hundreds of apartments does not have to be difficult. The ABB-Welcome Configurator applies all the planning rules for you. You just need to tell him what you want and need.

#### ABB-tacteo Configurator

You can configure your individual ABB-tacteo KNX Sensor with the ABB-tacteo configurator. The freedom of planning with KNX is now also reflected on your glass touch sensors on your wall – because every function and scene is unique.

#### Commissioning through the MyBuildings portal

Via MyBuildings portal you can easily and securely set up remote access for instance to your ABB Smart Home System, set up ABB-free@home Alexa voice control or start the Busch-ControlTouch commissioning.

## Digital Services

### Services

#### Remote Access and Notification

Sign up to the MyBuildings Portal to get secure Remote Access to your ABB smart home and smart building system. Check the status, control functions and receive notifications in case of events, which you can define. With a connected ABB-Welcome system see live streams from outdoor stations and open the door from anywhere in the world.

### Services

#### Voice Assistant and Home Appliance Integration

The MyBuildings portal allows easy integration of voice assistant devices and home appliances to your ABB smart home and smart building system. Control smart home and building functions via voice and integrate home appliances to push-buttons, wall-mounted panels, groups or scenes.

User Account	Price	Available for	URL
required	Integration of voice assistant is free-of-charge Integration of home appliance is free-of-charge	ABB-free@home (Amazon Alexa, Miele, HomeConnect) free@home Google Home integration Busch-VoiceControl (Amazon Alexa, Apple HomeKit, Google Assistant)	mybuildings.abb.com

#### Cloud backup

The new presence detectors come with an App for easier commissioning. The MyBuildings portal allows you to save a backup of your settings so can always access certain configurations, even after change of phones or operating systems (e.g. from Android to iOS). MyBuildings portal makes it possible not only the transmission of the device profiles and data of the app to a new smartphone, but also to additional terminal devices.

User Account	Price	Available for	URL
required	free of charge	Busch-Presence detectors	mybuildings.abb.com

#### Remote Commissioning

Via MyBuildings portal you can easily and securely set up remote access for instance to your ABB Smart Home System, set up ABB-free@home Alexa voice control or start the Busch-ControlTouch commissioning.

## Digital Services

### Configurators

#### ABB-Welcome

Planning a door entry system for a residential compound with hundreds of apartments does not have to be difficult. The ABB-Welcome Configurator applies all the planning rules for you. You just need to tell him what you want and need.

User Account	Price	URL	Supported Device
not required	free of charge	welcome-configurator. mybuildings.abb.com	iOS and Android tablets and desktop computers

#### Firealarm system

The firealarm configurator applies all planning rules for you. Just draw the layout of your building and the configurator tells you where smoke detectors should be placed and how many you'll need.

User Account	Price	URL	Supported Device
not required	free of charge	firealarm-configurator. eu.mybuildings.abb.com	iOS and Android tablets and desktop computers

#### ABB-tacteo

You can configure your individual ABB-tacteo KNX Sensor with the ABB-tacteo configurator. The freedom of planning with KNX is now also reflected on your glass touch sensors on your wall – because every function and scene is unique.

User Account	Price	URL	Supported Device
required for ordering	free of charge	tacteo-configurator. mybuildings.abb.com	iOS and Android tablets and desktop computers

#### Terminal

Plan and configure your project with classical wiring accessories, KNX or free@home with the terminal configurator by ABB

User Account	Price	URL	Supported Device
not required	free of charge	terminal.mybuildings.abb.com	iOS and Android tablets and desktop computers

### Smarter Home Developer Program

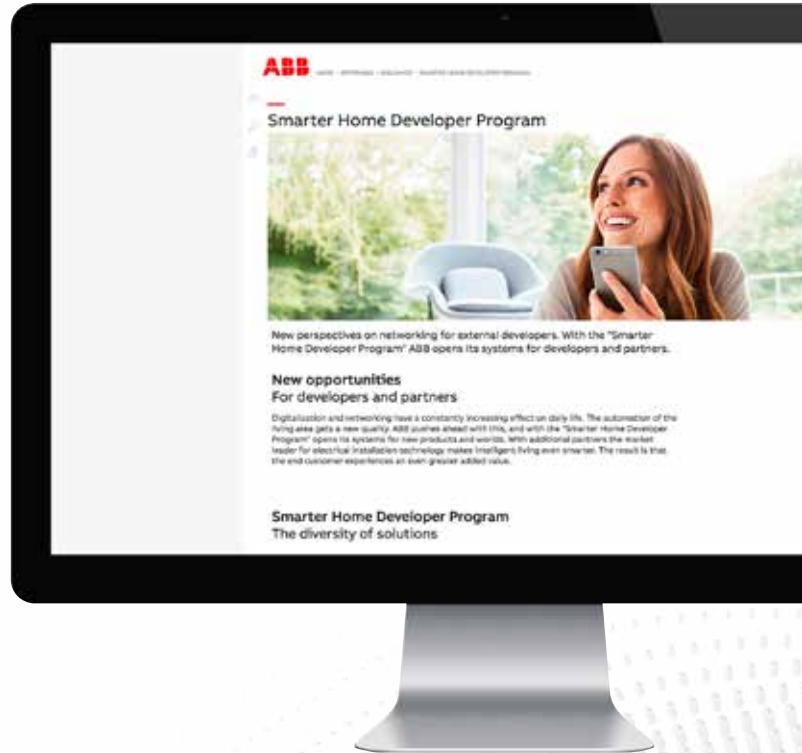

#### Living is becoming even smarter

ABB's cooperation with renowned partners offers extensive solutions and great added value.

#### Smarter Home Developer Program

To enable customers to choose from an even greater variety of products in the future, ABB has created the "Smarter Home Developer Program" for developers. The program combines ABB's core offering with solutions from external partners. This enables planners and electricians to equip smart residential buildings with a diverse range of components from different manufacturers and to operate them centrally using ABB products. As an interface for networking, ABB offers application programming interfaces (API).

- Easy and quick integration of your products and services with the ABB product and service portfolio
- Marketing visibility
- Access to households with integrated smart home solutions
- Opportunities to discuss joint offerings with ABB
- Global reach using the smart home portfolio of the two brands Busch-Jaeger and ABB

### Smarter Home Developer Program

#### ABB-free@home® API

The API for ABB-free@home® allows manufacturers and service providers to integrate data from ABB's Smart Home system into their own program and vice versa.
