ABB installed first DC Fast Charging Station in Delhi

One Terra53 CJG fast-charger will charge electric cars and buses in Delhi

Customer : Niti Aayog

Location : New Delhi, India

Industry : Electric mobility

Customer need

- Enable next generation of e-cars & e-buses which are silent, flexible and emission free
- Enable e-mobility for public charging to work with 90% of car from global manufacturers

ABB's solution

- One **Terra53 CJG** fast-charger
- Connected to the cloud for remote diagnostics and management, and to receive over-the-air software upgrades to ensure maximum availability
- Connected to payment gateways and grid interfaces for Smart Apps and Smart Grid Integration
- Multi-standard charger with CCS, CHAdeMO and AC Charging standards within the same unit.
