Type 2 + 3 SPD's have characteristics of type 2 but also type 3, they are capable of discharging the currents generated by indirect lightning strikes (T2 8/20μs), but also they have a low residual voltage (Up), who is compatible with the withstand voltage of sensitive electronic equipment. They are generally less powerful than a pure Type 2 SPD. Higher is the Imax, more powerful they are. They are installed in sub-distribution boards or close to sensitive equipment. They can be used on their own.

- Din rail mounting
- Pluggable
- Excellent technical features
- Improved safety
- Pro M compact design
- Back up protection up to 125 A Fuse or Mcb
