## Common Drive Control (CDC) system (APC 2)

### 1. CURRENT LIFECYCLE STATUS

The Common Drive Control system is in the classic phase of the ABB drives lifecycle plan and is planned to remain in this phase until 2009.

### 2. SUPPORT AVAILABILITY

During the classic phase the product will be fully supported and maintained by ABB regardless of which manufacturing unit delivered the product.

During this phase ABB will also offer a full set of services for the product, including, but not limited to:

- spare parts and repair services (new and refurbished parts and electronics repair)
- training services
- technical support and on-site support services

### 3. LIFECYCLE PLAN

The Common Drive Control system is planned to be transferred to the limited phase in 2010. In this lifecycle phase ABB does not guarantee availability of all the services anymore and hence recommends that CDC end-users initiate a migration planning to new ABB control technology by 2013, when the product is planned to be transferred into the obsolete phase. In the obsolete phase the product support is contingent to component availability and spare part deliveries are limited to the existing stock.

### 4. FURTHER INFORMATION

For further information, please contact ABB by e-mail: [global.productsupport@fi.abb.com](mailto:global.productsupport@fi.abb.com).
