Type 2 SPD’s are designed to discharge the currents generated by indirect lightning strikes causing induced or conducted overvoltages on the power distribution network. They are characterized by an 8/20μs waveform (Imax). Higher is the Imax, more powerful they are. They are installed in the main distribution switchboard but also in sub-distribution board. They have a low residual voltage Up often compatible with the withstand voltage of the equipment to protect. If this is not the case or the cable length to the equipment is longer than 10m, another level of coordination with OVR T2-T3, OVR T3 will be needed.

- Din rail mounting
- Pluggable
- Excellent technical features
- Improved safety
- Pro M compact design
- Back up protection up to 125 A Fuse or Mcb

### Protection mode

### Electrical characteristics

- Nominal discharge current $I_n$ (8/20) kA: 20
- Maximal discharge current $I_{max}$ (8/20) kA: 80
- Impulse current $I_{imp}$ (10/350) kA: 6,25
- Maximal continuous operating voltage $U_C$ V: 440
- Maximal continuous operating voltage d.c $U_{C,d}$ V: -
- Type of current / Frequency: a.c. 47-63 Hz
- Voltage protection level at $I_n$ $U_{n}$ (L-PE): kV: 2,1
- Voltage protection level at $I_{max}$ (L-N): kV: 1,5
- Voltage protection level at $I_{imp}$ (N-PE): kV: 2
- Short circuit withstand $I_{sc}$, kA: 100
- Total current $I_{total}$, kA: 80
- Follow current interrupted $I_{f}$, kA: ≤ 16
- Ground residual current $I_{pe}$, μA:≤ 140
- TOV withstand (L-N : 5s / N-PE : 200 ms) $U_T$: kV: 3817 / 1200

### Mechanical characteristics

- Curve B or C Circuit breaker A: 2.125
- gL - gl fuse A: 2.160

### Miscellaneous characteristics

- Maximal altitude m: 2100
- Weight g: 500
- Response time ms: 2.25
- Fire resistance according to UL 94 V-0
- Replacement cartridges

### INSTALLATION

### Key characteristics

- Protection mode: L-N / L-PE / N-PE
- Number of protected lines: 4
- Test class: III
- End of life indicator: Yes
- Safety reserve: Yes
- Nominal discharge current $I_n$: (8/20) kA: 20
- Maximal discharge current $I_{max}$: (8/20) kA: 80
- Impulse current $I_{imp}$: (10/350) kA: 6,25
- Maximal continuous operating voltage $U_C$: V: 440
- Maximal continuous operating voltage d.c $U_{C,d}$: V: -
- Type of current / Frequency: a.c. 47-63 Hz
- Voltage protection level at $I_n$ $U_{n}$ (L-PE): kV: 2,1
- Voltage protection level at $I_{max}$ (L-N): kV: 1,5
- Voltage protection level at $I_{imp}$ (N-PE): kV: 2
- Short circuit withstand $I_{sc}$: kA: 100
- Total current $I_{total}$: kA: 80
- Follow current interrupted $I_{f}$: kA: ≤ 16
- Ground residual current $I_{pe}$: μA:≤ 140
- TOV withstand (L-N : 5s / N-PE : 200 ms) $U_T$: kV: 3817 / 1200

### Dimensions

- H x W x D: mm: 88 x 71.2 x 69.4
- Wire range: solid wire: 2.5 ... 35
- Wire range: stranded wire: 2.5 ... 25
- Stripping length: mm: 12.5
- Packing quantities: piece: Per 1

### Comments

- Ground residual current
- Voltage Combination Wave $U_{oc}$: kV: -
- Required thermal/break up protection
- DIN rail mounting
- Excellent technical features
- Improved safety
- Pro M compact design
- Back up protection up to 125 A Fuse or Mcb

### Replacement cartridges

- Phase / Product ID: OVR T2 80-440s C QS 2CTB815708R5500
- Neutral / Product ID: OVR T2 N 80-440s C QS 2CTB815708R5700
