# Product change notification

## NEMA Residential Products Brand Migration

In accordance with the ABB global strategy, the ELSB NEMA Residential Products will be branded ABB. Previously, most of these products were branded GE or GE by ABB. This change will begin in October 2024.

### Brand Migration benefits

In 2018, ABB acquired GE's Industrial Solutions business and since then, ABB has invested substantially to electrify the future of housing through expanded production facilities, dedicated experts, and product development and portfolio expansion. Starting in October 2024, all GE residential electrical products – from load centers to circuit breakers – will migrate to the ABB brand. As part of the brand migration, the residential products will join the commercial and industrial ReliaGear® portfolio under the ABB brand as **ReliaHome™**. With over 100 years of innovation history between ABB and GE Industrial Solutions, this brand migration will give customers ABB pioneering technology, dedicated resources, and GE load center compatibility all in one.

### Enhanced features

The brand migration will occur in conjunction with the launch of ABB's newest product, ReliaHome™ load centers. The new ReliaHome™ load center will replace the PowerMark™ Gold and PowerMark™ PRO load center families and provide quality and installation friendly features such as plug-on neutral design, galvanized rust-resistant enclosures, and integral circuit breaker mounting rails.

Residential Circuit Breakers, including the latest Tandem and Quad space-saving designs, are backward compatible with both legacy PowerMark™ Gold and PowerMark™ PRO load centers. In addition, the circuit breakers will be forward compatible with ReliaHome™ load centers.

There is no change to any products already launched under ABB brand (i.e. ReliaMod™ modular metering, ReliaHome™ Smart Panel).

A comprehensive list of residential products and their brand migration date is included in the appendix.
