Products impacted:	Emax2 E2.2, E4.2 and E6.2		
Impact on Form/Fit/Function:	Fit	Impact on reliability:	No

Dear Customer,

ABB is always striving to deliver high quality products that provide our customers excellent user experiences and competitiveness. With this aim in mind, we are continuously reviewing and often improving the performance, documentation, etc. of our offerings.

As part of this regular follow-up process, we recently made a change to our standard offering:

Description of Change

For the products impacted (above), lifting plates will no longer be offered as standard supply on both fixed devices and moving parts. The lifting plates can be purchased separately.

Customer Impact of Change and Recommended Action

Customers will need to purchase lifting plates separately under product code: 1SDA081454R1.

Reason for Change

At ABB, we take care of our customers, our people, and the environment.

Prior to this change notice, one lifting plate was delivered with each device. Over the years, several customers have pointed out that for their applications fewer lifting plates were needed then delivered resulting many times in material waste.

Thanks to this action we saved almost 7 kgCO₂e for each circuit breaker. *

In summary, this change was made with the environment in mind. Now customers can order what is needed at a competitive price and together we can lower our impact on the environment. When it comes to sustainability, every bit counts!

*Data coming from LCA Analysis, considering manufacturing and distribution phases.
