

BUSINESS AREA: ELECTRIFICATION

ABB Smart Buildings

Facts & Figures

ABB's Smart Buildings division is a world-leading provider of Smart Home, Smart Building and intelligent community solutions with a pragmatic and innovative spirit that underpins our commitment to social and environmental responsibility and sustainability. Our solutions are shaping the future by making buildings intelligent, energy efficient, and future-orientated whilst inspiring creativity, maximizing safety, and optimizing comfort. ABB Smart Buildings division is present in over 100 countries, with around 35 manufacturing sites delivering more than 1.5 million products a day.

Revenues

\$2,750–3,250 million

Market position

No. 3 globally
No. 1–2 in Distribution Enclosures
and DIN-Rail Products

Key market drivers and trends

- Urbanization, digitalization or decarbonization will require customers to re-think the way they create and operate buildings in the future.
- Technology will play a very important role, and products will need to become more digitally- enabled in order to offer solutions to customers' requests in the future.
- Instead of buying hardware products up front, some customers are expected to require pay-by-use business models where they buy a service.
