

SmartMedia Handling and Care

SM Series
Videographic Recorders

Follow the manufacturers' recommendations.

- 1) Avoid touching the gold connectors on SmartMedia cards to prevent damage to the card from static electricity. Before touching a memory card, ensure that you are discharged of static electricity by touching a grounded metal object.
- 2) Keep the gold contacts on the card clean to prevent card corruption on insertion of the card. Clean the contacts using a soft, clean cloth before re-insertion in the instrument.
- 3) Do not bend the card or subject it to sudden impacts.
- 4) Keep the card in an anti-static film case when not in use.
- 5) Do not place the card in direct sunlight.
