What we do in Florence

In Florence, we provide aftermarket support and service for power and electricity distribution equipment including switchgear, breakers and other electrical equipment. The electrical products that Florence repairs, retrofits, and upgrades can be found on the power grid and at industrial and commercial locations. By servicing and upgrading electrical infrastructure with the latest technology, ABB ensures reliable power delivery for homes and businesses across the country.

Who we serve

ABB's Florence facility provides services to a wide scope of customers that depend on reliable electrical infrastructure to power their operations. We provide support across industries including, electric utilities, power generation facilities, industrial operations, and commercial businesses. The electrical equipment ABB services, retrofits, and upgrades, ensure safe and reliable power to keep businesses running and homes powered.

ABB in the U.S.

ABB is a global technology leader in electrification and automation, enabling a more sustainable and resource-efficient future. The United States is ABB's largest market, and we have significantly expanded our operations across the country through strategic acquisitions and investments.
