Step by step

to success

Get all the benefits from a complete system

Enclosures

With our System pro E enclosures, you will find a first-class quality assortment of enclosures and accessories, from the smallest consumer unit to industrial sized automation and main distribution boards in compliance with international standards and sectorial norms.

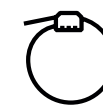

DIN-rail products

With our system pro M DIN-rail products, you will find a complete assortment of first-class quality products such as miniature circuit breakers, residual current devices, surge protection devices, control, signaling, measuring and smart accessories. Using the full pro M system from ABB will unleash a world of advantages for protection as well as smart and efficient solutions.

Wiring accessories

Modern light switches are more than just functional; they can serve as fascinating design objects. They combine aesthetic quality with innovative technology. ABB has a full range of solutions to meet local requirements and consumer tastes.

Wire and cable management

ABB's broad offering of wire & cable management solutions is designed to make the task of fastening, protecting, insulating and connecting wires easier and quicker for industrial applications, constructions, communications, utility and OEM professionals as well as do-it-yourself specialists.

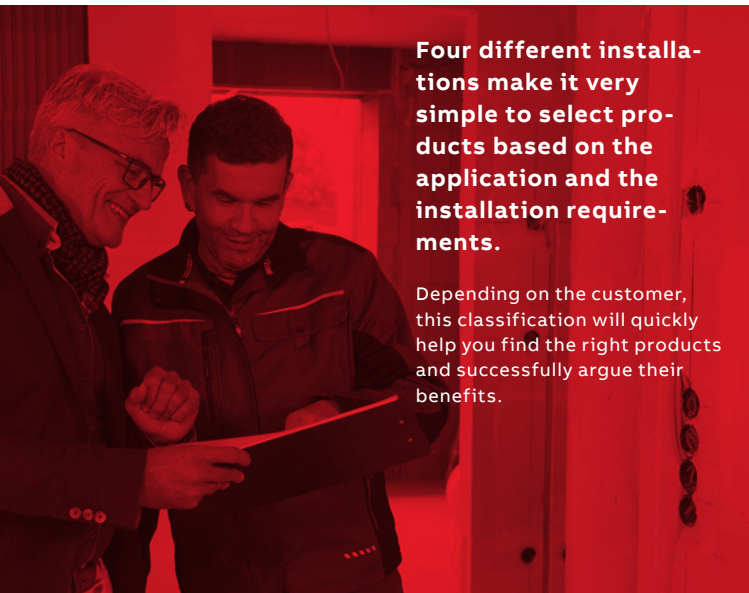

Door communication products

The new modern door communication ABB-Welcome now creates new possibilities of communication between the two worlds – comprehensive comfort with greater safety along with stylistically suitable design. The system harmoniously adapts to the architecture outdoors and indoors. In the interior area it can be uniformly arranged with light switches and socket outlets.

Intelligent building solutions

Installation and commissioning has never been easier. From start to finish, ABB-free@home® makes home automation easy. It saves electricians valuable time and gives them a competitive advantage. Simply impressive.

Four different installations make it very simple to select products based on the application and the installation requirements.

Depending on the customer, this classification will quickly help you find the right products and successfully argue their benefits.

basic installation

With the devices in the basic installation, you can quickly and cost-efficiently complete any standard installation task.

extended installation

In the extended installation, you find products for a better selectivity in your electrical distribution system.

advanced installation

The advanced installation includes devices that further increase safety and comfort...

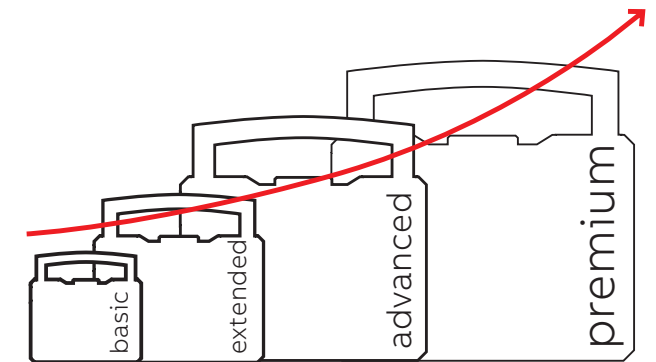

premium installation

...and the premium installation includes the whole offer for home automation and energy management.

More value for you and your customers
