Inspection and Diagnostics service

Know your drive's current condition

Inspection and Diagnostics service enables you to recognize your drive's future maintenance needs by measuring and analyzing the condition of your drive and its application.

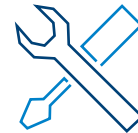

Diagnosis received

You know the current condition and state of your drive based on the results of diagnostics.

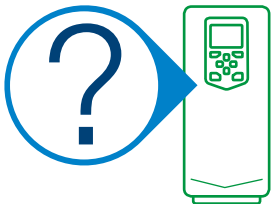

Consequences explained

You learn how the current condition of the drive can affect its operational reliability.

Recommended solution

You get recommendations that will keep your drive in the optimal condition.

Is my drive suitable?

The service is available for ABB drives that are in active or classic phases of their life cycle.

Need help?

Contact ABB or third party channel company.

ABB Inspection and Diagnostics service delivery

Life Cycle Assessment review

We identify the critical drives for the process or application so that clear priorities for maintenance can be set.

You want to know the condition of your drive

Inspection and Diagnostics service helps define current drive's condition and how it will affect the lifetime of your drive and its application.

Contact your local ABB

We inspect your drive

ABB-certified engineers have the expertise and tools to precisely analyze a wide range of drives. The inspection can be done either during normal operations or during planned production shutdowns. Local safety requirements are closely followed.

You receive a drive diagnosis

We provide you with a detailed diagnostics report including our findings along with short- and long-term drive maintenance recommendations. The drive will be registered, if it is not done earlier.

You can make an informed decision about future drive maintenance
