

ABB Advant Open Control System (OCS)

Power supply preventive maintenance kits

ABB Advant control system power supply preventive maintenance kits from ABB are available for AC410, AC450 and AC460 Systems.

Problems solved by Advant OCS power supply preventive maintenance kits

- Extensive downtime due to power supply failures
- Unknown condition of power supply
- Compromised power supply components are unnoticed

Why ABB's solution is the best

ABB experience with Advant OCS power supply lifecycle provides important data regarding proactive power supply maintenance. Following prescribed maintenance, using certified ABB OEM parts protects and enhances the reliability of your Advant system.

The solution

Advant OCS power supply kits from ABB, with component replacement guidelines, reduce the likelihood of extended downtime due to power supply failure.

The benefits

- Prepackaged kits
- Genuine certified ABB parts
- Avoid downtime due to power supply failure

ABB Advant OCS power supply kits:

	System	Part Number	Recommended Replacement*	Includes
	AC410 System Unit	PM3YAC410-1	3 years	Battery
		PM10YAC410-SA167	10 years	Power supply (SA167)
	AC450 System Unit	PM3YAC450-3	3 years	Fan, Filter, Fuse, Battery
		PM10YAC450-SA167	10 years	Power supply (SA167)
	AC460 System Unit	PM3YAC460-3	3 years	Fan, Filter, Fuse, Battery
		PM10YAC460-SA167	10 years	Power supply (SA167)

* Replacement interval recommendation. Corrosive environment may reduce recommended replacement intervals. Exchange requires the return of the original power supply.
