ABB machinery drives
ACS355, 0.5 to 30 hp/0.37 to 22 kW

The ABB machinery drives are designed to be fast drives to install, parameter-set and commission. Thus saving hours of engineering work. They are highly compact and cost effective and equipped with cutting-edge intelligence and an innovative safety capability. The drives are designed specifically to meet the production and performance needs of system integrators, original equipment manufacturers (OEMs) and panel builders, as well as the requirements of end users in a broad range of applications.

**Highlights**
- Worldwide availability and service
- Exceptionally compact drives and uniform design
- Quick commissioning with application macros and panel assistants
- Safe torque off function (SIL 3) as standard
- Sensorless vector control
- Built-in brake chopper
- High protection class variants for demanding environments
- Permanent magnet and induction motor control
- Torque memory for lifting applications
- Common DC bus
- 600 Hz maximum output frequency
- Sequence programming for controlling state machines without a PLC

**Saving cost with cutting-edge intelligence and flexilibity**
Up to eight preset sequences of operations can be created in minutes with the drive's PC tool to reduce the need for external PLC components. Versatile fieldbus connectivity to most PLCs on the market is also available. The drive includes Safe torque-off function as standard helping machine builders to fulfill the latest machinery directives.

Additional features include Speed Compensated Stop. This makes the drive ideal for material handling applications that require precision stopping that is independent of variations in process speed. For demanding environments high protection class variants are available in IP66/IP67/UL Type 4X classes that are NSF certified.

**Options**
- Auxiliary I/O modules
- MTAC pulse encoder interface
- MREL module for additional relays
- MPOW for external auxiliary power supply
- Fieldbus connection via optional modules
  - PROFIBUS DP
  - CANopen®
  - DeviceNet™
  - Modbus
  - Ethernet
  - Profinet
  - EtherCAT®
  - LonWorks®
- FlashDrop tool for fast pre-configuration without powering the drive
- DriveWindow Light PC tool for easy parameter setting and graphical sequence programming
- External EMC filters for category C2 compatibility
- Input chokes for IEC 61000-3-12 compatibility

**Power and voltage range**
- 3-phase, 200 to 240 V ± 10%
  0.37 to 11 kW (0.5 to 15 hp)
- 3-phase, 380 to 480 V ± 10%
  0.37 to 22 kW (0.5 to 30 hp)

**Application specific firmware variants available:**
- High speed spindle
- Enhanced sequence programming
- Solar pump drive
- Low ambient start

**Saving time in installation and commissioning**
The drive's compact and uniform dimensions facilitate multiple drive solutions and cabinet installations. Different mounting options enable flexible installation in restricted spaces.

With the FlashDrop tool the drive can be preconfigured in seconds without powering the drive. The drive’s application macros and assistants enable fast and easy commissioning.

### Mains connection

#### Voltage and power connection

1-phase, 200 to 240 V ±10%:
- 0.5 to 3 hp (0.37 to 2.2 kW)
- 0.5 to 15 hp (0.37 to 11 kW)
- 3-phase, 380 to 480 V ±10%:
- 0.5 to 10 hp (0.37 to 22 kW)

#### Frequency

48 to 63 Hz

#### Motor connection

#### Voltage

3-phase, from 0 to U<sub>Relay</sub>

#### Frequency

0 to 599 Hz

#### Overload capacity

1.5 x I<sub>N</sub> for 1 minute every 10 minutes

#### Switching frequency

4 (default) to 16 kHz with 4 kHz steps

### Programmable control connections

#### Two analog inputs, signal selectable

Voltage signal:
- + 10 V, 0 (2) to 10 V

#### Current signal

±20 mA, 0 (4) to 20 mA

#### Analog output

0.5 to 3 hp (0.37 to 2.2 kW)

#### Five digital inputs

12 to 24 V, PNP and NPN, programmable DI5

#### One relay output

NO + NC, 250 V AC/2 A, 30 V DC/0.5 A

#### One digital output

Transistor output, 30 V DC/100 mA, programmable 10 Hz to 16 kHz pulse train

#### Accuracy

24 V DC ±10%, max. 200 mA

#### Environmental limits

14 to 104 °F (-10 to 40 °C), no frost allowed

#### Relative humidity

122 °F (50 °C) with 10% derating

### Figure 1. Inputs and outputs configuration based on ABB standard macro and external digital input supply voltage.
