Communication module (COM)

Ethernet, RJ45 connection
only for LHM and RC-tools

Optical serial port, ST connector

Observe polarity sequence
of RL connectors
Observe polarity sequence
Observe polarity sequence
Transformer module (TRM)

Compression or ring lug terminals

* Indicates high polarity. Note that internal polarity can be adjusted by setting of analog input CT neutral direction and or on SNAI pre-processing function blocks.
Analog input module (AIM)

Compression or ring lug terminals

* Indicates high polarity. Note that internal polarity can be adjusted by setting of analog input CT neutral direction and or on SMAl pre-processing function blocks.
Binary input/output module (BIO)

Observation: polarity sequence of RL connectors

Configuration:
- INPUT1
- INPUT2
- INHIB
- START
- OPER
- OK
- ALARM

Legend:
