

Course description

Webtraining

MV Drive Operation & Maintenance Follow-up

Course goal

This web-based follow-up training is targeted at operation and maintenance personnel, who attended an ABB MV Drives classroom training some time ago. The goal is to refresh the knowledge about the system and to clarify questions which came up during the daily work.

Learning objectives

The knowledge about the drive system is refreshed and the participants have the opportunity to discuss open points with the drive expert.

Participant profile

Electricians, technicians and engineers who operate, maintain or troubleshoot ABB MV Drives

Prerequisites

- Completion of Operation & Maintenance classroom training
- Computer or laptop
- Webcam recommended
- Headset
- Internet connection

Topics

- Question & Answer session
- Repetition of the drive theory
- Review of the recommended troubleshooting procedure
- Simulation of a real fault case on our training unit

Methods

Web-based training
Presentations
Demonstrations/simulations using training units over web

Duration

Approximately 2 hours
Longer session and/or customer specific topics on request
