# ABB to deliver digital substation for Technopark in Kerala

Digital substation to improve grid reliability, efficiency and safety

**Customer** : Technopark

**Location** : Kerala, India

**Industry** : Power Distribution

## Customer need

- Improve flexibility, availability, reliability and safety, while **reducing installation costs** and environmental impact
- Turn **real-time data** into actionable intelligence and bring cost efficiencies
- **Reduce the risk** of electrical hazards to operators

## ABB's solution

- **110 kV digital substation**
- More compact, flexible, reliable, safer,
- Cost effective over the lifecycle
- Simpler to maintain and extend than a conventional one
