

Cut CO₂ emissions by 260 million tons a year?

In 2011 alone, the power saved by our installed base of drives cut global CO₂ emissions by 260 million tons. This intelligent motor control system that adjusts the speed and reduces the amount of energy used by motor-driven equipment is just one of many ABB power and automation solutions to manage energy consumption efficiently, reduce carbon emissions and bring savings to our customers. www.abb.com/betterworld

Absolutely.
