

EXTERNAL COMMUNICATION | MARCH 20, 2024

Residential Circuit Breakers: AFCI

Product Update

Effective immediately, the Plug-on Neutral Arc Fault Circuit Interrupters will be manufactured without the redundant load neutral lug. Plug-on AFCIs have a secure neutral connection through the ReliaLock™ feature, and it does not require the redundant load neutral lug. Contractors will wire the white load neutral wire directly into the neutral bar. All AFCI versions are compatible with ABB plug-on neutral load centers.

Updated Plug-on Neutral Combination Arc Fault Circuit Interrupters:

- THQL1115PAF2
- THQL1120PAF2
- THHQL1115PAF2
- THHQL1120PAF2
