Offering
Circuit Breakers
and Enclosed
Control Products

Number of employees
230

Operational since
2016

What we do in Senatobia

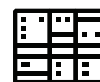

Senatobia's 500,000 sf facility manufactures power circuit breakers, including state-of-the-art Tmax XT and Emax 2 products, Safe Y power panel boards, TrueOne automatic transfer switch assemblies, and other enclosed control products. Senatobia is the only facility in the U.S. that makes molded case circuit breakers, that provide the necessary protection and connections for electrical systems. Digitally enabled, these breakers allow advanced control functions and ensure efficient, reliable, and smart power supply for American industry and businesses. ABB invested \$36m starting in 2016 to expand operations and add 220 new jobs. The plant is expected to employ 350 people by 2022.

Who we serve

Circuit breakers and control products are used in a wide range of applications and can be found in industrial facilities, commercial buildings, and data centers. Our circuit breakers help protect the equipment, appliances, and devices that drive American businesses, buildings, and factories from electrical faults.

ABB in the U.S.

ABB is a leading global technology company that energizes the transformation of society and industry to achieve a more productive, sustainable future.
