

OHV Repair Service

ABB Electrification Services

01 Rebuilt OHV Wheel Motor

ABB brings many years of knowledge and expertise to the repair and refurbishment of major OHV components, including wheel motors, alternators, grid blowers and more.

Comprehensive Services

For more than 30 years, ABB has offered a full range of high-quality OHV services. Our service centers specialize in providing services for demanding surface mining operations. ABB engineers and technicians have extensive experience servicing equipment across the U.S. and Canada. Our OHV services include:

- Scheduled Major Overhauls
- Emergency Repairs
- Component Rebuilds
- On-site Services
- Spares Management
- Exchange Programs

ABB's Off-Highway Vehicle (OHV) repair services can help you improve performance, extend life, reduce maintenance costs and maximize the productivity of your heavy haul vehicles.

Service Provider Choice

When determining the proper service center for your OHV repair and refurbishment, choose a service company with the proper equipment, tooling, manpower and technical experience to provide service excellence. With its large machine tool equipment, proper welding fixtures and procedures, specialty tooling, and 30+ years of technical experience, ABB is a world-class provider.

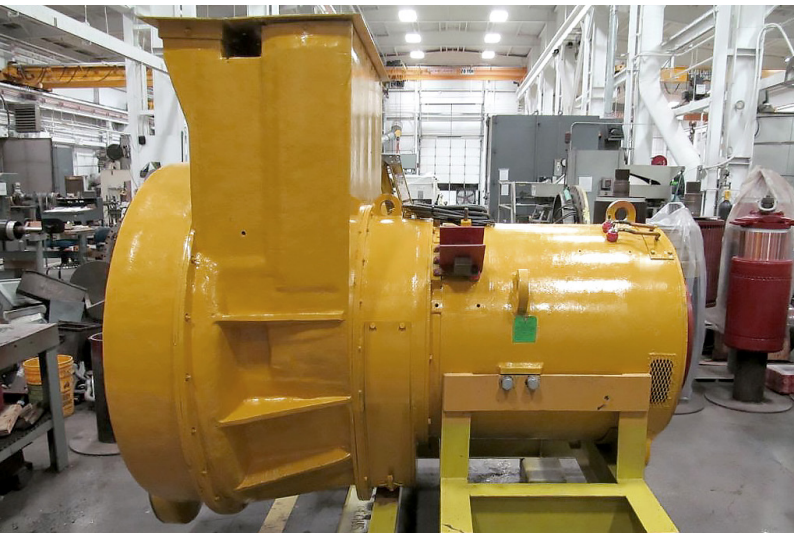

Features

- Wide range of repair and overhaul services
- Services provided in authorized ABB service centers or on-site
- Large machine tool equipment and specialty tooling
- Proper welding fixtures and welding procedures
- All rebuilds conform to OEM specifications and use OEM recommended suppliers for bearing and seal components.
- 30+ years of experience

Equipment Serviced

We service many major components of OHV equipment, including:

- Wheel Motors
- Alternators
- Auxiliary Blowers
- Grid Blowers

01

- 01 Rebuilt OHV Alternator
- 02 Rebuilt Grid Blower

Benefits

- Improve durability and performance
- Reduce maintenance costs
- Maximize productivity

ABB can provide services ranging from simple repairs to a major overhaul that includes upgrades of parts, materials and required modifications.

Enhancements to improve durability and increase reliability offer our customers an opportunity to make their OHV equipment perform better than ever. Improved materials and years of experience servicing hundreds of OHV equipment components have helped us to develop improvements and modifications that bring real value to our customers.

02

The ABB Advantage

OHV services from ABB offer several important advantages over service typically received from OEMs or other providers.

- **Improved Performance and Extended Life.** Through material upgrades, and redesigned components, ABB can greatly enhance the performance and reliability of your OHV equipment.
- **Complete Range of Services.** We offer more comprehensive services than most other service providers, including OEMs.
- **Shorter Cycle Times.** In most cases, ABB can complete comparable services for your OHV equipment in less time than the OEM or another service provider.
- **Competitive Pricing.** You can often reduce your maintenance costs with OHV services from ABB versus other service providers.
