ABB i-bus® KNX
Blind/Roller Shutter Actuators with travel detection and manual operation x-fold, 230 V, MDRC
JRA/S x.230.5.1, 2CDG 110 12x R0011

The 2-fold, 4-fold and 8-fold Blind/Roller Shutter Actuators are used to automatically control independent 230 V AC drives, for positioning blinds, roller shutters, awnings and other shading products via ABB i-bus® KNX. The devices are also used, for example, to control doors, windows and ventilation flaps. The travel times of the drives are automatically determined via end position detection and stored. The output contacts are mechanically interlocked, so that voltage cannot be applied to both contacts at the same time.

The outputs can be directly controlled on the device using the manual push buttons. The LEDs on the front of the device signal the status of the outputs. The devices do not require an auxiliary voltage. Individual outputs can be copied or exchanged to reduce the programming effort.

The Blind/Roller Shutter Actuator is a modular installation device for installation in the distribution board on 35 mm mounting rails. The connection to the ABB i-bus® is implemented via bus connection terminals.

ABB i-bus® KNX
Blind/Roller Shutter Actuators with travel detection and manual operation x-fold, 230 V, MDRC
JRA/S x.230.5.1, 2CDG 110 12x R0011

Isolation category
Overvoltage category III to EN 60 664-1
Pollution degree 2 to EN 60 664-1

KNX safety extra low voltage
SELV 24 V DC

Temperature range
Operation -20 °C...+45 °C
Storage -25 °C...+55 °C
Transport -25 °C...+70 °C

Ambient conditions
Maximum air humidity 93 %, no condensation allowed

Design
Modular installation device (MDRC)
Dimensions (H x W x D) in mm: JRA/S Type 2.230.5.1 4.230.5.1 8.230.5.1
- Height 90 90 90
- Width 72 72 144
- Depth 64.5 64.5 64.5
Mounting width in space units (modules at 18 mm) 4 4 8
Mounting depth 64.5 64.5 64.5

Weight without packaging
JRA/S Type 2.230.5.1 4.230.5.1 8.230.5.1
Weight in kg 0.2 0.25 0.45

Installation
On 35 mm mounting rail To EN 60 715

Mounting position
As required

Housing/colour
Plastic housing, grey Halogen free

Approvals
KNX to EN 50 090-1, -2 Certification

CE mark
In accordance with the EMC guideline and low voltage guideline

* ... = current version number of the application. Please observe the software information on our homepage for this purpose.

Note

The ETS and the current version of the device application are required for programming.
The current version of the application is available for download on the internet at www.abb.com/knx. After import in the ETS, it is available in the ETS under ABB/Blind/Switch.
The device does not support the closing function of a KNX device in the ETS. If you inhibit access to all devices of the project with a BCU code, it has no effect on this device. Reading out data and programming is still possible.

Important
When electronic drives are used, the closed circuit current may not exceed 150 mA, as otherwise the automatic travel detection function may not function correctly. In this case, the travel times for the drives must be determined manually and entered into the ETS parameters.

Electronic drives with soft start or soft stop are not suitable for the control via JRA/S.
