What we do in Athens
Manufacture industrial electric motors ranging from 40-500 horsepower for a wide variety of industrial applications, including pumps, fans, compressors, conveyors, crushers, and other industrial applications. Athens also produces traction motors for the train and locomotive market, including regional transit trains. Athens is proud to be the first NEMA motor manufacturing plant in North America to achieve ISO9001 quality certification.

Who we serve
The electric motors produced in Athens are used in a broad range of industries and manufacturing, including agriculture, food and beverage, mining and aggregate, minerals, chemicals, conveying and locomotives. Original equipment manufacturers (OEMs) use motors made in Athens as essential components in their products used to serve these industries. Our product offering is designed around our customers’ needs for reliability, availability, variety, and energy savings.

ABB in the U.S.
ABB is a pioneering technology leader that works closely with utility, industry, transportation and infrastructure customers to write the future of industrial digitalization, increasing productivity and boosting efficiency.
