**Current life cycle status**

The mentioned product sub-type of MEGADRIVE CASCADE drive is available as a replacement product for older MEGADRIVE CASCADE drives. It is in the **Classic** phase according to the ABB life cycle model outlined above.

**Life cycle plan**

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

It is planned to keep the mentioned product sub-type – which is available only as replacement drive – in the Classic phase until further notice. After manufacturing of this product sub-type as replacement drive has ceased it will remain for at least 10 years in Classic phase before it will be transferred to Limited phase.

**Recommended actions**

Besides the regular maintenance no actions are required. Full range of life cycle services and support are available during the Classic phase.

**Further information**

For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.

**Product availability**

The mentioned sub-type is available for sale as replacement product in case of plant extension or renewal of installed base.
