MEGADRIVE-LCI (PSR) with magnetic firing types PSR1, PSR2 or PSR2 arcnet

Active	Classic	Limited	Obsolete
Active sales and manufacturing phase	Product is available for plant extension or renewal of installed base	Product is no longer available for sale Manufacturing has stopped	
Full range of life cycle services and support		Limited range of life cycle services and support	Replacement and end-of-life services

Current life cycle status

All MEGADRIVE-LCI (PSR) drives with magnetic firing (types PSR1, PSR2 or PSR2 arcnet) are in the <u>Obsolete</u> phase according to the ABB life cycle model outlined above.

Life cycle plan

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

In the Obsolete phase the product support for MEGADRIVE-LCI drives with magnetic firing is limited to fundamental life cycle services that facilitate lifetime extension by applying Control Upgrade service.

Recommended actions

It is highly recommended to upgrade the drive's control unit to PEC control platform (refer to Control Upgrade service product description). After this Control Upgrade service the drive installation will return to the Classic phase where complete life cycle services will be available (refer to Life cycle Status Statement of MEGADRIVE-LCI (PSR) after Control Upgrade).

Alternatively the drive can be replaced by MEGADRIVE-LCI (PEC).

Further information

For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.

Product availability

Manufacturing of product has stopped. Instead, MEGADRIVE-LCI (PEC) is available for sale.

Service availability

Following services are available

Control Upgrade

Replacement

Life cycle Assessment

Following services are limited

Spare Parts 1

Technical Support 2

On-site Repair ²

Preventive Maintenance 3

Following services are not available

Service Agreements

Classroom Training

On-site Training

Inspection & Diagnostics

⁽³⁾ Available in course of a Control Upgrade

⁽¹⁾ Service limited to power electronic section and its components

 $^{^{(2)}}$ Limited availability on case-by-case basis, based on best-effort
