ELECTRIFICATION PRODUCTS LIFE CYCLE SERVICES

Obsolescence notice

August 2026

Dear ABB Customer,

ABB hereby provides the life cycle status for the products below. According to the Product Life Cycle Policy for ABB Electrification,[1] please find the list of the obsolete product versions and the corresponding replacements proposed:

Obsolete Product family	Obsolete Product	New equivalent product name and version
Electro-Mechanical Relays	SKDT/SKD1T	KD11 (Non-Direct replacement), Customized engineered solution using Relion REX640 to meet project specific application requirement
Electro-Mechanical Relays	SDG1T/SDG2T/SDG4T	Customized engineered solution using Relion REX640 to meet project specific application requirement

Obsolete phase means:

- Equipment is not available
- Spare parts availability is not ensured

More details:

- No longer manufactured as a complete product
- Spare parts availability diminish over time with decreasing installed base
- Life extension solutions are granted

1 - This includes Electrification Smart Power (ELSP), Distribution Solutions (ELDS), and Service (ELSE).

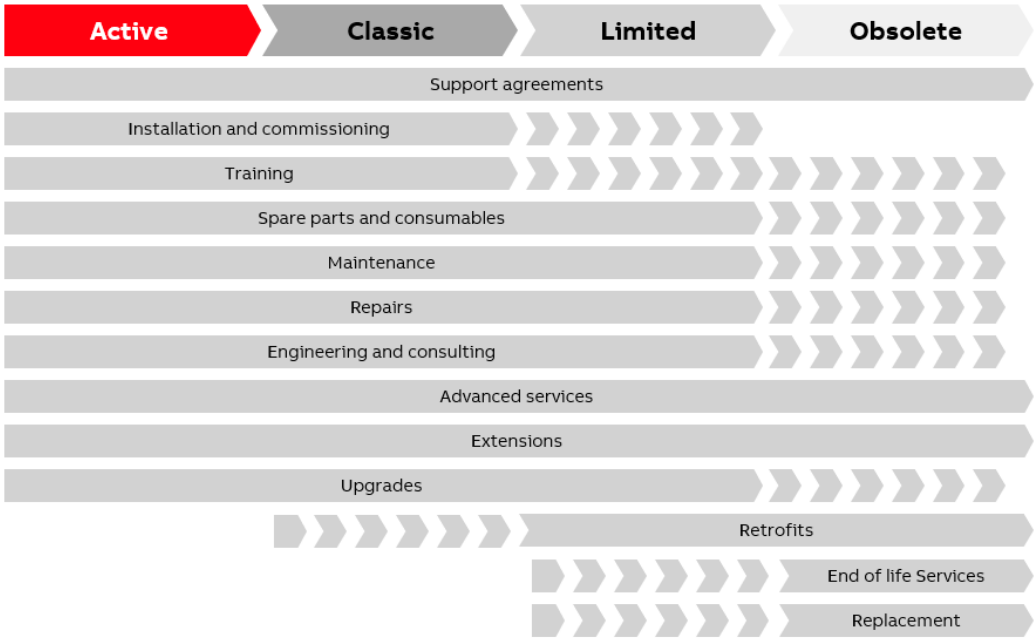
Detailed information about the entire the life cycle of products is available and continuously updated. You can get further information via the following channels:

- On demand to ABB representatives
- Visiting the ABB website at the LCM webpage

Customers that have activated a Power Care support agreement will be granted:

- Periodical notification on Life Cycle changes
- Constant, autonomous monitoring of their equipment lifecycle via ABB Connect Partner Hub Service tile

The whole world of ABB services hereby represented is at your disposal for making the best use of ABB assets at every life cycle stage:



We thank you for your understanding and co-operation. We hope that this information helps you initiate evolution planning of the installed systems/products. Please feel free to contact us in case you need more information about this phase-out notice.

Yours Sincerely,

Umer Khan
