Switching Sequence/Ankopplingsfoljde:

The switching is performed by means of the directer switch only.

Contact arm moves one step, after which the directer switch operates as follows: 1. open, 2. close, 3. open, and 4. close.

Contact arm H moves one step, after which the directer switch operates as follows: 1. open, 2. close, 3. open, and 4. close.

Kopplingslaget utförs efter dessa tal."
