Environmental Information
EA140021ML

Date: 2014.12.05

Scope of the declaration
The scope of this document is to give information about environmental aspects and the compliance to the environmental regulations for ABB Residual Current Breakers with Overload Protection.

Series: RCBOs DS202C

Company:
ABB SpA - Low Voltage Products Division – LPG Din Rail Products
Viale dell’Industria 18, 20010 Vittuone Milano – Italy

ABB SpA - Low Voltage Products Division – LPG Din Rail Products develops, manufactures and sells products for the electrical installation and automation of buildings, machines and plants.

ABB SpA - Low Voltage Products Division – LPG Din Rail Products is certified according ISO 9001, ISO 14001, OHSAS 18001 and IRIS.

Product compliance:
The RCBOs comply with the actual requirements of the EU directive 2011/65/EC (“RoHS”).
http://www05.abb.com/global/scot/scot209.nsf/veritydisplay/4496835d97f8fdd3c1257d02002bd806/sfile/ROHS%20CSC422002K2701.pdf

Materials, wherever requested by the REGULATION (EC) No. 1907/2006 (“REACH”) have been registered at ECHA by the producers. They do not contain substances as specified in the related candidate list of SVHC as published in: http://echa.europa.eu/it/candidate-list-table

ABB does not use or process directly any of the conflict minerals as defined in Dodd-Frank Section 1502 (Sn, Au, Ta, W). Nevertheless, according to our current best knowledge, our products don’t contain any material coming from Covered Countries (DRC Area).

The RCBOs do not contain PCB, asbestos, cadmium, halogens, silicone and radioactive element
RAMS (Reliability, Availability, Maintainability & Safety)

The design and material is proven in various industrial applications and environment for more than 10 years without relevant or systematic failures.

The RCBOs are maintenance free considering the RCBOs has to be verified periodically by pressing the dedicated test button as indicated in the documentation supplied with the product.

All devices are approved by third party organizations on the base of the relevant product standards, e.g. IEC/EN 61009-1

Product description

Residual Current Breakers with Overload Protection (RCBOs)
contain the following materials (with small variations per type)

List of Materials

<table>
<thead>
<tr>
<th>Material</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Steel</td>
<td>34.3%</td>
</tr>
<tr>
<td>Copper</td>
<td>6.4 %</td>
</tr>
<tr>
<td>Brass</td>
<td>15.1%</td>
</tr>
<tr>
<td>Other metals(Ag/W, Ag/C)</td>
<td>0.4 %</td>
</tr>
<tr>
<td>Polymers</td>
<td>43.8%</td>
</tr>
</tbody>
</table>

Recycling Information

At the end of operating life, constituent components of DS202C have been optimized in order to reduce waste amount and increase recovery of the material. Metals and polymers contained into DS202C products are characterized by high recycling rates. The recyclability potential of the product has been evaluated using IEC / TR 62635.
