

Configurable Remote Power Panels
Save time with preconfigured RPP solutions

Flexibility

Upgradable and expandable

in the field and during operation
thanks to SMISLINE plug-in system
and CMS bus-wiring architecture

One sensor

for all currents

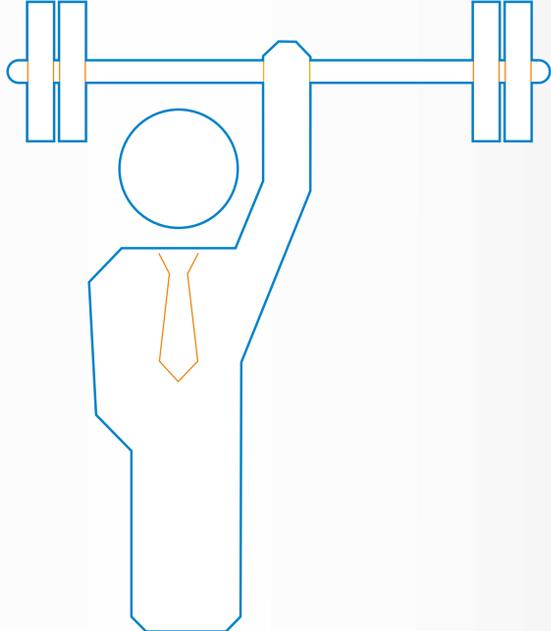

CMS sensor rapidly captures
AC, DC and mixed setups

Effortless

mounting and installation

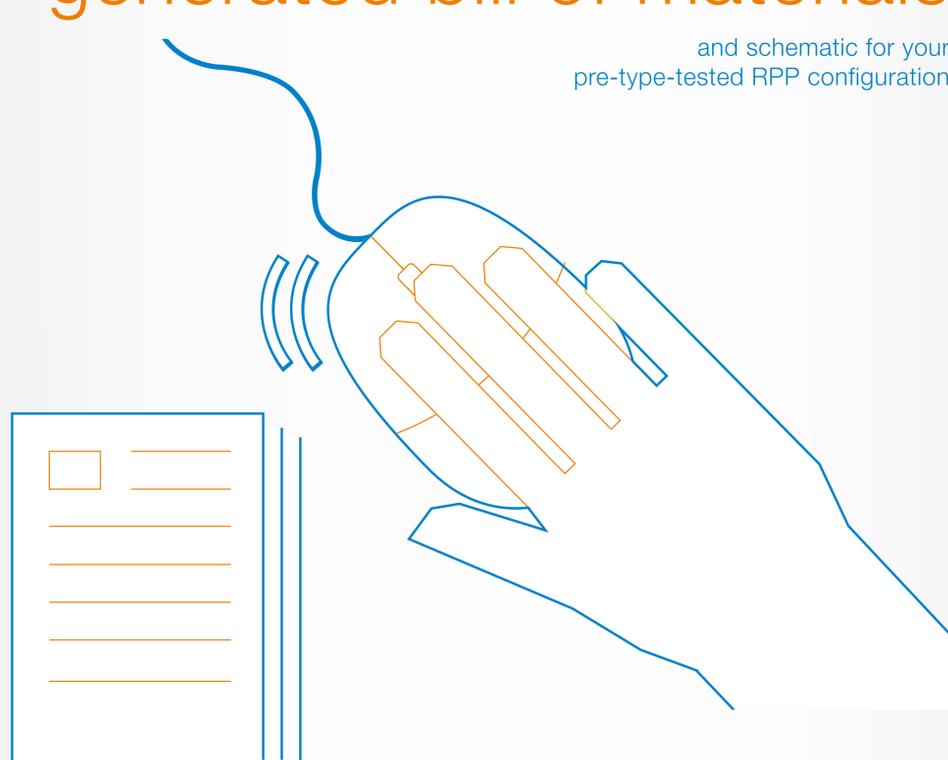

thanks to integrated input wiring
and preconfigured, free software

Configure

automatically generated bill of materials

and schematic for your
pre-type-tested RPP configuration

Ease

of doing business

immediate design completion
and instant 3D visualisation
