**Current life cycle status**
The MoCon Robust® crane drives is in the Limited life cycle phase since 1.4.2014 according to the ABB life cycle model outlined above.

**Life cycle plan**
It is planned to keep MoCon Robust® in the Limited phase until 30.6.2022, after which it will be transferred to Obsolete phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

**Further information**
For more information on drives life cycle management and available services contact your local ABB organization or at www.abb.com/drives.

**Product availability in Limited phase**
MoCon Robust® crane drives have been removed from sales and are no longer available since 1.4.2014. Orders received before 1.4.2014 are handled as confirmed.

Warranty liabilities are handled as defined in valid Price List for MoCon Robust® Crane Drives, chapter Warranty Period at the time of purchase.

MoCon Robust® is a family of crane drives consisting of:
- MoCon Robust® FC for frequency control of induction squirrel cage motors
- MoCon Robust® PC for phase angle control of induction slip ring motors
