SELMA 2 Control System (mapped version)

1. CURRENT LIFECYCLE STATUS

The SELMA 2 control system (mapped version) is in the classic phase of the ABB drives lifecycle plan and is planned to remain in this phase until 2011.

2. SUPPORT AVAILABILITY FOR SELMA 2 CONTROL SYSTEM (mapped version)

In the classic phase the product is fully supported and maintained by ABB.

The following productized services are available:

- spare part and electronics repair services
- on-site and preventive maintenance services
- training services
- technical support services
- update and upgrade services

3. LIFECYCLE PLAN

The SELMA 2 control system (mapped version) is planned to be transferred to the limited phase in 2012. In this lifecycle phase ABB does not guarantee availability of all the services anymore and hence recommends that SELMA 2 end-users initiate a migration plan to renew the ABB control technology by 2015, when the product is planned to be transferred into the obsolete phase. In the obsolete phase the product support is contingent to component availability and spare part deliveries are limited to the existing stock.

4. FURTHER INFORMATION

For further information, please contact ABB by e-mail: global.productsupport@fi.abb.com.
