

Transformer service. Lifecycle support backed by over 100 years of experience.

With over 100 years of experience and a large global installed base, we understand the value of life cycle support and total cost of ownership. We put our domain expertise and leading-edge technologies at the disposal of our customers, to help them maximize the return on their transformer assets by ensuring optimized performance, high reliability, lower life cycle costs and reduced environmental impact. ABB has over 50 transformer facilities and more than 25 service centers worldwide, offering a range of engineering solutions, condition monitoring, and preventive and predictive maintenance, off-site and on-site repair, as well as refurbishment and spare part services. www.abb.com/transformers
