

ABB Control Systems

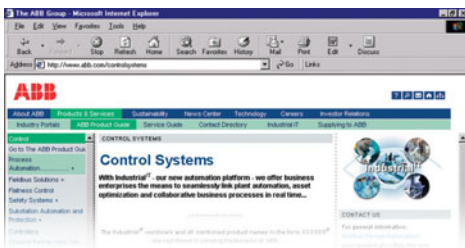

We safeguard your investment.

At ABB, our mission is to help you get the most value from your existing control system investment. Customers all over the world rely upon our control systems to keep their businesses running efficiently. We'll help you reach your goals of improved performance and lower life cycle costs by working hand-in-hand with you.

You have the opportunity to build upon your existing system by adding new technological advances represented by ABB's Industrial^{IT} offerings to get even more return out of the systems you have. At the same time, ABB is dedicated to preserving the process security and value of your control system investment.

ABB remains committed to adding value to each phase in the life cycle of your plant, mill, or utility. We provide the industry's most comprehensive system life cycle and evolution programs to enhance your overall functionality and productivity, and superior ongoing product support and service to keep your system running at peak performance.

Use what
you have
to get what
you need.

Yesterday, today and beyond, ABB remains your complete process automation partner—it's investment protection you can bank on.
