# T&B® Fittings Ranger® stainless steel liquid-tight cord connectors

Extreme cord rage combined with extreme corrosion resistance

01 2920SST series stainless steel

In response to customer demand, ABB developed the latest addition to its high-performance line of T&B Fittings Ranger cord connectors. Made of Type 304 stainless steel, Ranger stainless steel liquid-tight cord connectors stand up to highly corrosive environments — such as washdown areas in food and beverage or pharmaceutical processing — as well as high temperatures and UV exposure.

Like all Ranger liquid-tight cord connectors, the stainless steel connectors offer twice the cord diameter range of similar connectors, so you can do more with fewer sizes to order and stock. They form a non-slip mechanical grip, providing a liquid-tight seal and the strain relief required for flexible portable cord connections.
