

High quality sugar without the production hiccups.

At the heart of sugar production are motor-driven applications such as pumps, fans, mixers, presses, conveyors, mills and centrifuges. All these can benefit

www.abb.com

from the use of ABB drives, motors and PLCs. From lower energy use through to high reliability, ABB's equipment can make a significant contribution towards

ensuring your next sugar campaign is a success. To refine your production techniques, call ABB.
