Fieldbus communication
PROFIBUS

Fast and easy communication
ProfiBus (Process Field Bus) is a standard for fieldbus communication in automation technology. PROFIBUS DP (Decentralized Peripherals) is a standard for fieldbus communication in automation technology and is used to operate sensors and actuators via a centralized controller in production and factory automation applications. The anybus module have solid security to prevent unauthorized software to be downloaded to the module. Furthermore, encryption is used to prevent illicit copying.
