ABB Measurement & Analytics

Facts & Figures

ABB’s Measurement & Analytics division is among the world’s leading manufacturers and suppliers of smart instrumentation and analyzers. With thousands of experts around the world and high-performance digital technology, ABB’s team is dedicated to making measurement easy for its industrial and energy customers by providing the right data that helps them operate more efficiently and profitably. ABB Measurement & Analytics operates in more than 60 countries. Its employees ensure ongoing service and support globally in around 15 factories and around 50 service support centers.

Revenues
$750–1,250 million

Market position
No. 1 Analytical & Force Measurement
No. 3–5 Instrumentation

Key market drivers and trends

- **Sustainability and regulations**: International regulations for GHG reduction and water directives drive the demand for emissions monitoring in industrial processes and quality and leakage detection in oil & gas and water & wastewater.
- **Energy transition**: Measure and control process data to operate more efficiently.
- **Digitalization**: Leverage sensor technology for industry’s digital transformation.

Market
~$10 billion
