

Touch the sky with your hands

We present the Sky Niessen switch range with two unique and innovative designs. A collection of light switches created so that your spaces take on a new dimension.

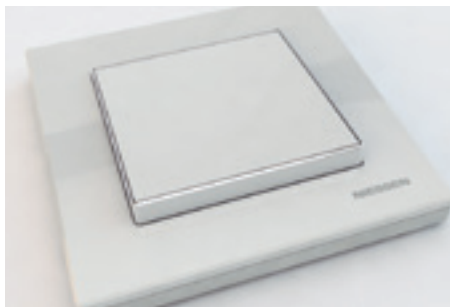

It is a range of switches that evolved in the shapes and materials used. An object of desire capable of guaranteeing the quality that only Niessen can offer you.

Feel special everyday, feel that you have the sky in your hands with the Sky Niessen switches.

One switch range, two personalities

SKY
NIESSEN

Elegance on every side

Linear, balanced, slim... With the Sky Niessen switches you can give each one of your spaces a modern touch. Details count and with Sky Niessen your home will be full of them.

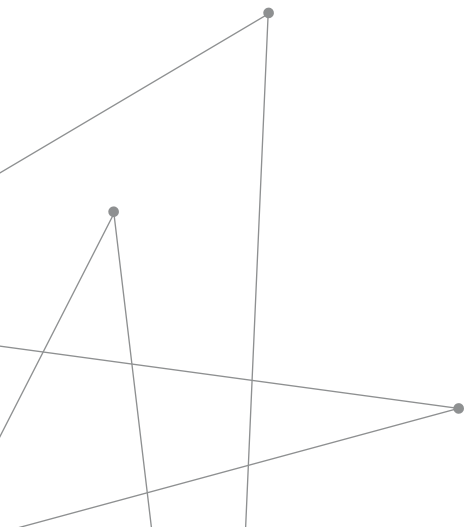

SKY MOON

A distinctive touch

With the Skymoon line you will achieve that distinctive touch that makes a room a unique space. Its avant-garde design will mean that all eyes will be drawn to the most attractive item in your home or business.

SKY
NIESSEN

Slim, balanced, perfect.

At just 8.5 mm thick, Sky Niessen barely protrudes from the wall. Thanks to the use of subtle components, with Sky Niessen you will achieve a visual perception of perfection in the decoration of any room.

• MAXIMUM
SLIMNESS
8,5mm

• High-quality and
durable finishes

• Minimum gap between
switch and frame

• Display
Lighting in white

• Lateral chrome

• Noble materials in switch
and frame

Eco-design •

The Sky Niessen switch range has
been designed following the Product
Design and Development Environmental
Management regulations: Eco-design.

Renew your spaces

With Sky Niessen you can give your spaces a new air, as it perfectly adapts to other installations done with Niessen. The use of Niessen luxury mechanism facilitates the installation and renovation of each room.

Integration and perfection in all aspects

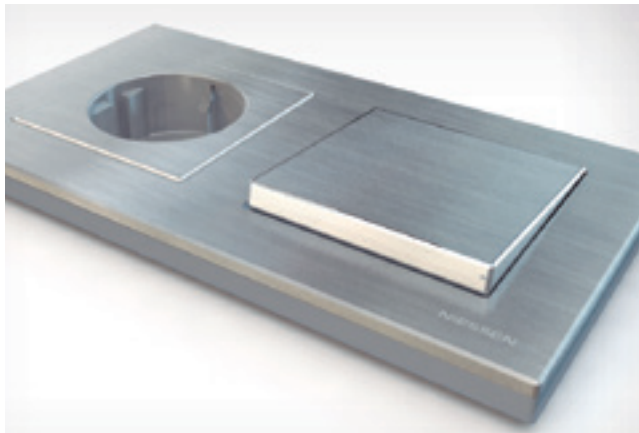

With a protrusion of just 8.5 mm above the wall surface, Sky Niessen becomes the series with the most functionality in the least volume. The gap between the switch and the frame is minimised and decorated with chrome details. In addition, its minimalistic design is ideal for combining it with contemporary architecture.

A series designed for you

Sky Niessen is a collection of switches that responds to the demands of consumers. It is a switch range created to last over time, both thanks to the quality and variety of its finishes, and to its design.

Forward-looking

ABB i-bus® KNX

We live and work in an increasingly automated world.

It is a world that is improving all the time, and it will become more and more difficult and expensive to manage traditional electrical installations.

With the intention of facilitating the electrical management of buildings, Sky Niessen integrates the KNX sensors by ABB, thus becoming a series with high added value when configuring the installation.

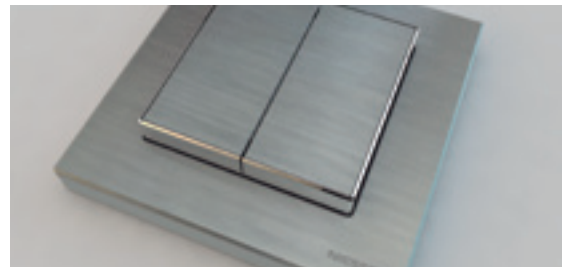

Free@home

Sky Niessen incorporates the functions of the new home automation system by ABB. Many advantages in one. Free@home combines all the useful functions of comfortable domotics in an easily understandable system. Free@home sensors and actuators to act on loads, regulate lighting, control RGB, control the temperature or detect movement. Sky Niessen and free@home, simply a success thanks to its elegant design, utmost simplicity and freedom.

Wireless

Wireless is the control system with wireless technology by Niessen. Its emitters are also available with the Sky Niessen aesthetics, control units that can be installed on any surface, even furniture, as there is no need for a power supply thanks to the incorporated battery.

Designed to control the on/off function of lights, shutters and many other functions in the home to provide more comfort and quality of life.

Hit by Niessen

With Sky Niessen and Hit by Niessen a sound track in each space is created.

The first sound system that adapts to the current way of listening to music and radio. With Bluetooth to connect it to mobile devices and with a Multiroom function to listen to a melody in each space or the same in all spaces.

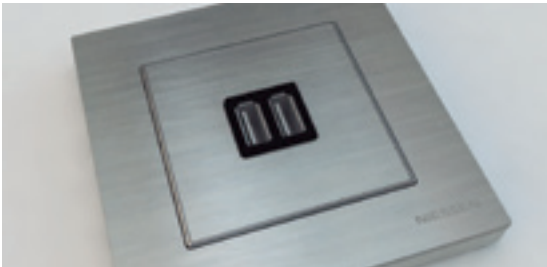

Sky Niessen and Hit by Niessen are the door so that each person can access their music universe from each room in the house or workplace, in a simple way and with the highest sound quality.

USB charger

The widespread use of smartphones and tablets in all spheres of society is now a reality. These new habits bring new power supply needs that can be easily solved with Sky Niessen. Wherever a power outlet exists or is planned, a Sky Niessen USB charger can be easily installed.

Thus the devices will be available at all times with the possibility of integrating the charger in the design of the rest of the rooms.

LED lamp dimmer

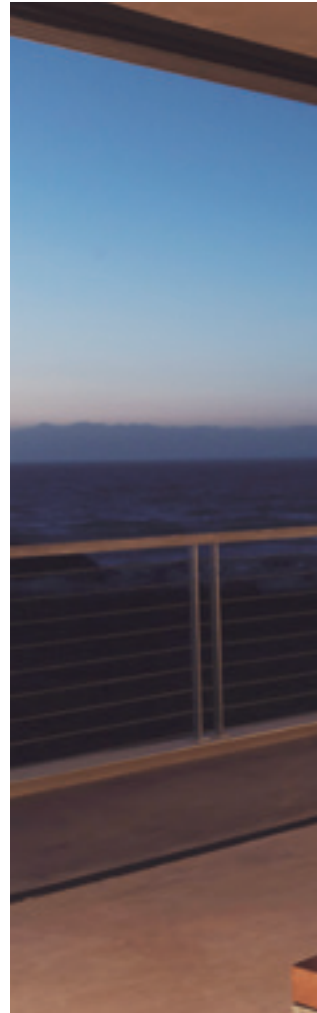

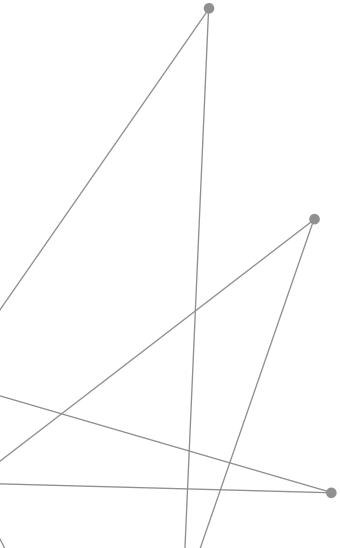

Low-consumption lights are already the norm, both electronic fluorescent and LED lights. And it is the latter that provide the most efficiency and are the most demanded.

That is why Sky Niessen integrates the LED dimmers by Niessen, provide the level of lighting really needed, and with the new design that adapts to all types of tastes and interior design trends.

SKYMOON

The finest and most exclusive by Niessen

Skymoon offers minimum protrusion from the wall with a standard installation. Its 6 mm thickness make it one of the market's thinnest lines. With Skymoon you will have a jewel to decorate the most exclusive environments.

• MAXIMUM
SLIMNESS
6mm

• Machined metal switch
Also the covers of the functions

• Chromed outlet cover
Available in stainless steel and black finishes

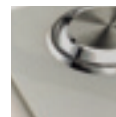

• Display
Lighting in white

• 100% noble materials
Available in stainless steel and glass finishes

• Perfect integration between
switch and frame
Acting as a single assembly

Eco-design •

The Skymoon line has been designed following the Product Design and Development Environmental Management regulations: Eco-design.

Unique and exclusive design

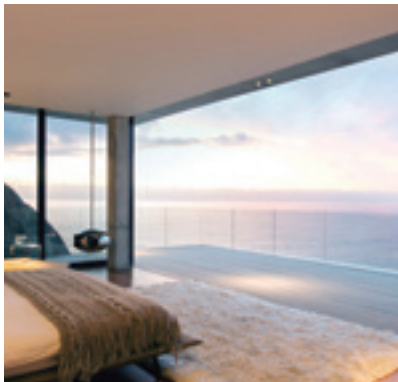

Skymoon is the ultimate expression of design, with unique class and subtlety. Its round shapes and combination of materials mean that this line is ideal to refine the most luxurious spaces.

The ultimate expression in avant-garde and innovation

Skymoon is an evolution in the market of switch series. Its unique and innovative design presents technical solutions never seen before, which makes Skymoon the focus of everyone's attention.

Designed with up to the smallest detail in mind

Noble materials, machined metal switches, 6 mm protrusion from the wall... In Skymoon all the details are designed to satisfy the desires of the most demanding customers.
