Purpose and function

This system is designed for WC facilities for people with reduced mobility and others in need of assistance.

When the alarm button is pressed or the pullcord is pulled, the indicator light outside the WC facilities will blink and the buzzer will sound intermittently. Each button has an indicator light that lets the user know that the request for assistance has been successfully made. The alert remains in effect until it is reset with the button beside the WC door.

WIRING:

A = E.G. 2x1,5
B = E.G. MHS 1 x 4 x 0,5
KLM 4 x 0,8
