PRODUCT SHEET

# Superstrut<sup>®</sup> three-sided half-slot channel

# Superstrut® three-sided half-slot channel

Half slots on all three sides offer four-sided functionality.

ABB introduces three-sided half-slot channel to its Superstrut metal framing line. Half slots on all three sides of the channel increase flexibility and adaptability during installation. This also enables users to make side-to-side connections and attach various accessories to all sides of the strut.

- Available in GoldGalv®, SilverGalv® and pre-galvanized finishes
- Channels are 1½" x 1½" (41.28 x 41.28 mm)
- Half-slot holes are ¾" wide x 1½" long (14.29 x 28.58 mm) with 2" (50.8 mm) center-to-center spacing

## Superstrut three-sided half-slot channel — 12-gauge steel
