Current life cycle status
ACS350 is in the Limited phase since 1.1.2017 according to the ABB life cycle model outlined above.

Life cycle plan
It is planned to keep ACS350 in the Limited phase until the end of 2019, after which it will be transferred to the Obsolete phase.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions
It is recommended to replace the ACS350 with the latest generation drives, e.g. ACS355 or ACS380.
