## InLine II Applications

InLine II covers a wide range of distribution applications from single panels to industrial, residential, and commercial buildings.

Office buildings  
Shopping malls  
Warehouses

Water treatment plants  
Waste management  
Telecommunication  
Public transport

Oil and gas  
Pharmaceutical  
Automotive  
Pulp and paper

Energy distribution  
Power generation  
Public services

## InLine II overview

A wide portfolio to meet your installation's requirements

ZLBM 00-100 mm

## InLine II

### Robust and reliable switching and protection

InLine II keeps your electrical distribution system running and your people safe. Its superior performance and smart design enable a flexible and efficient installation and allow easy and safe operation and maintenance in any application.

#### High performance

- Ratings up to 1000 V AC
- Short circuit protection up to 120 kA
- Range for high temperatures available. InLine II Cu+ versions are designed for high ambient temperatures, up to 55°C (131°F) without derating
- Integrated ventilation channel for optimized cooling

#### Safety and protection

- Easy and safe access to fuse contacts for voltage measuring and replacement of NH fuse links
- Possibility for padlocking to avoid unauthorized operation
- Sealing facilities available to indicate unauthorized access
- The degree of protection is IP30 (front)
- IP20 touch proof Z-busbar system available

#### Convenience and ease

- Available in two different versions, with different depths: ZLBM for space saving and ZHBM for easy integration of current transformers at the back
- Wide variety of cable terminals – Bolts or V-Clamps – enables a flexible installation and makes it possible to customize the product according to your needs
- Cable up or down solution with the same switch
- Suitable for vertical and horizontal installations

#### Continuous operation

- Electronic Fuse Monitoring (EFM) raises an alert in the event of a blown fuse.
- ITS2 intelligent monitoring unit for cloud-based connectivity with ABB Ability™ Energy and Asset Manager and enhanced safety features
- Preventive overload protection – adjust time and current thresholds

# High performance

## Ready to meet current and future requirements

### Robust operation in a wide variety of applications

Available as 160A, 250A, 400A and 630A types in combination with NH/DIN HRC Fuse Links according to EN/IEC 60269. InLine II has been type tested in accordance to EN/IEC 60947-3. The variants BZL and BZH have current ratings up to 2500 Amperes.

### Ready for high voltage trends

InLine II provides safe and reliable switching and protection for demanding applications such as photovoltaic installations and battery energy storage systems. The rated voltages are up to 1000 V AC, AC-22B utilization category, with a rated operational current of up to 630 A. The short circuit protection level is up to 120 kA.

Up to

**1000 V AC**  
ratings, utilization  
category AC-22B

Short circuit  
capacity up to

**120 kA**  
for fuse switch disconnectors

### Reliable in extreme conditions

The InLine II Cu+ variants have been designed for use in installations with ambient temperature up to 55°C (131°F), without derating.

The newest BZH1600A-S-T-3P-MB is a single switch disconnecter rated to withstand short circuits up to 40 kA, 1s, using 27% less width compared to alternative solutions.

Suitable for  
temperatures up to  
**55°C (131°F)**  
without derating

### Designed to keep cool

InLine II has been designed to give the most optimized ventilation of the switches to prevent overheating. An integrated ventilation channel at the side of the body will also support the air ventilation upwards between the switches when they are installed side by side.

800 V AC Fusegear

InLine II Cu+ for high ambient temperatures

# Safety and protection

## Inbuilt safety features

### Easy access for voltage measurement

Voltage can be measured safely using standard equipment. The front windows can be slid upwards, allowing easy and safe access to the NH fuse contacts.

### Padlocking and sealing

The open position can be locked with up to two padlocks.

To prevent unauthorized access, the front covers of the ZLBM/ZHBM 1-pole variants can be placed in park position with the possibility to be padlocked without additional accessories. The padlock hasp can also be used in this position when up to 3 padlocks per phase are required. Sealing facilities are also available to guarantee highest safety level by indicating unauthorized access.

### Degree of protection IP30

InLine II fuse switch disconnectors have an ingress protection degree of IP30 from the front in closed and IP20 in open position.

### Safe and easy replacement of fuses

InLine II is designed for an easy and safe replacement of NH fuse links. The designated replacement position minimizes the risk of contact with live parts.

Access points for voltage measurement

Padlock in open position

Padlock in park position

Padlock extension

Padlock in closed position

## Safety and protection

Easy and safe replacement of fuses

— ON – Closed position

— OFF – Open position

— Replacement of fuses position

— Release button

— Replacement of fuses

## Convenience and ease

### Easy and flexible installation

#### Designed for different busbar systems

The ZLBM size 00-100 is suitable for 100 mm busbar systems. The rest of the variants are suitable for installation at busbars with 185 mm distance.

#### Designed for

**100 and 185 mm**  
busbar systems

#### Fast and easy mounting on flat busbars

A selected variety of switches are now available with integrated hook clamps. Hook clamps are also available as separate accessories for all ZLBM versions.

Symmetric front position independent of the cable terminations are UP or DOWN

#### Easy connection for all types of cables

Variants with integrated V-Clamps and universal terminal bolts make the connection easy for all types of cables. The ZLBM/ZHBM sizes 1, 2 and 3 are delivered with standing M12 Bolts at the cable terminals as standard. The nut and the bolt can easily be exchanged if there is a need to insert the M12 Bolt from the front. The ZLBM/ZHBM versions sizes 00, 1, 2 and 3 can be delivered with integrated V-Clamps.

Hook clamps

Universal terminal Bolts

## Convenience and ease

### Save space and installation time

#### Space saving

There are two versions of InLine II, with different depths that can be selected according to application requirements and available space. The ZLBM versions with reduced depth of 121 mm are suitable for Cable Distribution Cabinets. The ZLBM versions generate up to 20% savings in panel depth and have 47% less depth compared to alternative solutions in the market.

The ZHBM versions with 154 mm depth enable easy integration of current transformers (CT) at the back side. It is possible to slide one current transformer per phase.

#### Faster, tool-less installation of current transformers

The current transformers (CT) in ZHBM variants have been especially designed to be slid on the back and locked on place with snap-on shrouds. The CT shrouds have integrated cable channels for easy cable supply up to a multi plug for external connection.

#### Speed up your project

A selected variety of In Line II switches can be delivered in bulk packages. With the bulk packaging, you can save up to two minutes of unpacking per switch.

The ZHBM 00/123 variants make it possible to slide on one current transformer (CT) at the rear side per phase

## Continuous operation

### Real time monitoring and easy serviceability

Monitor in real time

Ease serviceability

Minimize downtime

#### Electronic Fuse Monitoring functionality (EFM)

This functionality monitors operational status and, in the event of a blown fuse, raises an alert. It allows easy location of faults, enhancing safety, serviceability and minimizing downtime. The electronic fuse monitoring unit is integrated in InLine II.

#### Smarter, data-driven decisions made in real time

InLine II can have an integrated ITS2 monitoring unit. ITS2 enables cloud-based connectivity via ABB Ability™ Energy and Asset Manager, making it easy to monitor key electrical parameters in real-time and allowing users to optimize their networks simply and safely.

The ITS2 monitoring unit also includes EFM functionality and preventive overload protection.

The preventive overload protection feature makes it possible to configure time and current thresholds, increasing the level of protection in the system. This can be done in less than 1 minute using Ekip Connect.

# Electronic Fuse Monitoring

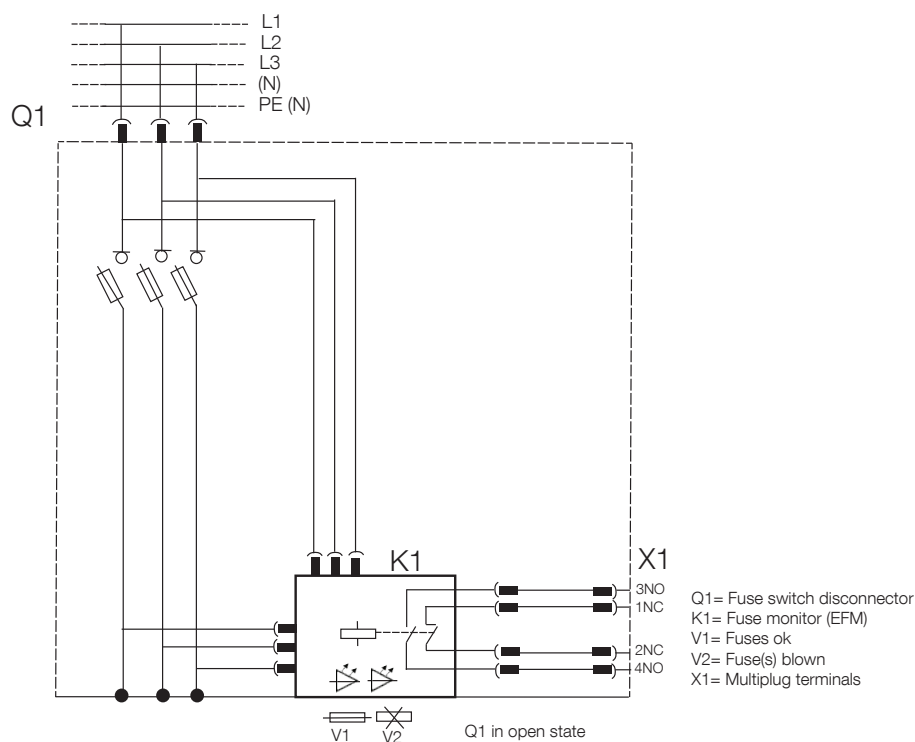

## Real time monitoring and easy serviceability

The Electronic Fuse Monitor (EFM) gives a remote alarm at any fault conditions if a fuse is blown and allows faults to be located quickly.

- The EFM unit is self-supplied, which means no additional power supply is required
- The EFM functionality is available up to 800 V AC
- The fuse status is also visible on the product, with red and green LEDs

InLine II with Electronic Fuse Monitor (EFM)

Fuse status	Relay contacts		Relay contacts	
	Green LED	Red LED	NO contact 11,12	NC contact 13,12
1. ON position			Open	Closed
Fuses OK	★	●	X	X
Fuses BLOWN	●	★	X	X
2. OFF position				
Fuses OK	●	●	X	X
Fuses BLOWN	●	●	X	X

## ITS2 monitoring unit

### Inside knowledge that puts you ahead

Real-time measuring and monitoring have never been easier, thanks to the ITS2. Its built-in intelligence means that whether it is supporting a data center, hospital or commercial building, operatives can access its monitoring data and provide an instant response in the event of any system faults.

**The result of this fully digital solution? Smarter, data-driven decisions made in real time.**

#### Integrated and future-ready

- Cloud-based connectivity with ABB Ability™ Energy and Asset Manager
- Easy configuration with Ekip Connect
- Configure ITS2 monitoring in just 1 min

Configure in less than

**1 minute**

with Ekip Connect

#### Convenience and ease

- One unit to digitalize switches and fusegear also compatible with OT switch disconnectors and OS Switch fuses
- Space-saving factory mounted design
- 80% faster installation

Full control in less than

**10 minutes**

#### Safe and reliable

- Ensures continuous operations
- Fuse monitoring functionality (EFM)
- System safety and protection protocols
- Increases the level of protection in the electrical system (Preventive Overload Protection)

## Derating tables

InLine II is a technically reliable and proven solution for demanding conditions

### Ambient temperatures for switches

The working ambient temperatures for the general range lays in between -25°C up to 40°C, considering no derating to be applied. The InLine II Cu+ range can withstand ambient temperatures up to 55°C without derating.

Derating table for general range

Ambient temperature in °C	Ith % of nominal current	Ith % of nominal current with EFM
40*	100	100
45	95	92

### IP2X insulation

Rear- front- and side insulation is required to guarantee full IP2X-protection. Black front insulation is usually used for phase-busbars, and blue front insulation for the N-busbar. The insulation fits both 1600 A and 2500 A busbars.

Designation	Order code	Length [mm]	MOQ
Rear Z-insulation 1200 mm	2CMA100046R1000	1200	12
Rear Z-insulation 1200 mm	2CMA100047R1000	1600	12
Rear Z-insulation 1200 mm	2CMA100048R1000	1800	12
Rear Z-insulation 1200 mm	2CMA100049R1000	2200	12
Front Z-insulation Black	2CMA100051R1000	20pc x 488mm + 20pc x 378mm Total length per package 17.32 m	20 (1 package)
Front Z-insulation Blue	2CMA100053R1000	10pc x 488mm + 10pc x 378mm Total length per package 8.66 m	10 (1 package)
Side insulation	2CMA100054R1000	-	24

## Ordering information

### Z-busbar system 1600 A & 2500 A

ZX153

#### Busbar support

For busbars with a length of over 1 meter an extra support is recommended in the middle.

Designation	Order code	Current [A]	MOQ
ZX153 support phase busbar	2CPX044008R9999	2500	1
ZX522 support phase busbar	2CPX067909R9999	1600 A	1
ZX563 support PEN/N busbar	2CPX068735R9999	-	1

T-slot nut

#### T-slot nut

The T-slot nut is used for connecting to the back of the phase busbar and is only available for 2500 A busbars. When connecting to the back of the 1600 A busbar a hole needs to be drilled and the connecting busbar screwed.

Designation	Order code	MOQ
T-slot nut	2CMA100056R1000	12

ZHBM CT Slide on rear side 600/5A 5,0V ACI.0,5s	1pc. Per package	1SEP619921P0001	0,2
ZHBM CT Slide on rear side 600/5A 5V ACI.1	1pc. Per package	1SEP619514P0001	0,2

#### Current transformers (CT) for ZHBM1/2/3

Type	Description	Order code	Weight (Kg)
ZLBM CT Terminal 200/5A 3,75V ACI.1	1pc. Per package	1SEP619506R0001	0,6
ZLBM CT terminal 400/5A 5V ACI.1	1pc. Per package	1SEP619516R0001	0,6
ZLBM CT terminal 600/5A 5V ACI.1	1pc. Per package	1SEP619517R0001	0,6
ZLBM CT terminal 600/5A 5V ACI.0,5	1pc. Per package	1SEP619519R0001	0,6

CT busbar kits for ZLBM 00 and ZLBM1/2/3

## Ordering information

### Ammeter for ZLBM123 and ZHBM123

A-meter housing

#### A-Meter and housing for ZLBM1/2/3 and ZHBM1/2/3

The ammeter can be installed into the ammeter house. It can be clicked into position at the top of the ZLBM/ZHBM or at the bottom side if the cable terminals are upwards.

Type	Description	Order code	Weight (Kg)
ZLBM / ZHBM 123 A-meter housing for A-meter 72x72 mm	1pc. Per package	1SEP619215R0001	0.13
Max A-meter QB72, 0-150-180/5A	1pc. Per package	NHSN714004P2206	0.2
Max A-meter QB72, 0-200-300/5A	1pc. Per package	NHSN714004P2208	0.2
Max A-meter QB72, 0-400-480/5A	1pc. Per package	NHSN714004P2210	0.2
Max A-meter QB72, 0-600-720/5A	1pc. Per package	NHSN714004P2212	0.2

Huckepack

#### Huckepack for ZLBM1/2/3 and ZHBM1/2/3

A plug in Huckepack for temporary additional output can be plugged through the front window into the incoming fuse contact in the apparatus. The huckepack is prepared for a NH 00 fuse link inside, and is equipped with its own cable terminal at the bottom side.

Type	Description	Order code	Weight (Kg)
ZLBM123 Huckepack		NHSN722068P0002	0,3

Plug in A-meter and CT at NH2 fuse link

#### Plug-in ammeters and CT for ZLBM1/2/3 and ZHBM1/2/3

Plug in ammeter through the front window by using a special NH2 Fuse link together with a slide in CT.

Type	Description	Order code	Weight (Kg)
Plug in CT for front cover inst. A-meter 200/5A 3,5V ACI.3		NHSN718050P2525	0,1
Plug in CT for front cover inst. A-meter 400/5A 5V ACI.3		NHSN718050P2540	0,1

Auxiliary switch

#### Auxiliary switches for ZLBM1/2/3 and ZHBM1/2/3

In the ZLBM / ZHBM the auxiliary switches 1 NO or 1 NC can be clicked into position at the side of the apparatus. The body of the apparatus have integrated cable channels for easy connection down or up to a possible multi plug for external connection. ZLBM00 and ZHBM00: 1 Aux. Switch per phase. ZLBM1/2/3 and ZHBM1/2/3: 2 Aux. Switches per phase.

Type	Description	Order code	Weight (Kg)
ZLBM Auxiliary switch NC	1pc. Per package	1SEP619554R0001	0,02
ZLBM Auxiliary switch NO	1pc. Per package	1SEP619555R0001	0,02

Huckepack

Mounting position of the auxiliary switch

Ammeter and housing
