

ABB MOTION

Remote Factory Acceptance Test

Fast inspections conveniently

For us at ABB, the reliability and quality of our drives is of the utmost importance. We want to ensure that the drive solutions meet the specifications of the purchase order.

To support our customers in this, we offer remote tests in our testing facility in the drives factory.

Save time and money

A remote connection means no need to travel to the factory, which saves money and time with hotel reservations and flights.

Reduce CO₂ emissions

Converting 50% of Motion's yearly FATs into RFATs could save an estimated 3,000 tons of CO₂ emissions due to reduced travelling.

Convenient option

Mobile cameras zooming in on the smallest details will provide you with an unprecedented view of your products without you leaving your home office. In addition, the remote connection makes it possible for you to participate in the test on short notice.

Check the service availability for your drive types with your local ABB representative.

ABB Motion Remote Factory Acceptance Test

Customer journey

Include Remote FAT in your new device order

We provide possibility for you to order remote FAT for your new drive. Test activities are provided according to your drive options.

Collect a list of participants for Remote FAT

You will receive a participant list template from your ABB representative to collect all the wanted participants in the test meeting. Invitations to the test and initial test documentation are sent to the participants in the list.

Join the Remote FAT meeting

All the participants will receive a Remote FAT meeting invitation with instructions on how to join the test.

Visual inspection of the product and documents

- Overview of the product
- Component and module inspection
- Label inspection
- Reviewing routine test report

Functional inspection

- Drive startup
- Operation of control panel
- Test run without load
- Example of protections and alarms
- Optional tests for ordered functions

Receive the final documents and certificates by email

Your local ABB specialist sends you all the documents and certificates to your email as soon as they are ready. Remote FAT report will be signed digitally.
