
CYLON® TECHNICAL BULLETIN NO. 487

Issue Date: 12 April 2022

ASPECT® v3.06.01

Summary

ASPECT software has been updated to support MS Windows 11, and also to address several general usability issues.

Features

ENHANCEMENTS:

ASP-5904 ASPECT-Studio now runs on PCs and VMs with Windows 11 Operating system.

ASP-5938 Spring dependencies have been removed from ASPECT-Studio / ASPECT to mitigate Spring4Shell Vulnerability.

GENERAL USABILITY:

ASP-5935 Graphic element edit and alignment buttons now work correctly for non-English version of ASPECT-Studio.

ASP-5903 ASPECT Point initial discovery now displays values with PV even when PV checkbox is not selected.

ASP-5779 PasswordConvert Error no longer arises.

Customer Impact

Customers using Windows 11 must use ASPECT-Studio v3.06.01 or later.

Customers affected by any of the usability issues are recommended to update when convenient.
