Reliable power wherever and whenever it is required

ABB offers reliable, modular, containerized “plug and play” microgrid solutions for industries and commercial sites that provide both on-grid or off-grid power whenever needed. Easily configurable and adaptable to your unique needs, ABB’s unique microgrid solutions ensure sustainable energy through the highest possible renewable energy penetration into existing or isolated grid. Helping to reduce CO2 emissions as well as dependency on fossil fuel supplies that are not only costly, but also uncertain. abb.com/microgrids
