Product life cycle change announcement

**DriveMonitor 4000 Reduced Version**

Current life cycle status

The DriveMonitor 4000 Reduced Version is in the **Active** phase according to the ABB life cycle model outlined above.

Life cycle plan

It is planned to transfer the mentioned product type to **Classic** phase on 01.01.2019 in which it will remain until end of 2021.

The ABB life cycle management model is designed to manage an orderly transition to new replacement products or to choose from various lifetime extending services. At the same time the model ensures access to continuing support for our customers.

Recommended actions

In **Classic phase** complete life cycle services are available for the mentioned product type.

It is recommended to start planning for a replacement in classic phase since its duration is only lasting until end of 2021 and afterwards replacements cannot be guaranteed. ABB has the following services as potential replacements in place:

- ABB Ability™ Remote Condition Monitoring
- ABB Ability™ Remote Assistance
- Coming next: ABB Ability™ On-site Condition Monitoring

Product availability

This product will be available for active sale until 31-12-2018

Service availability in Classic Phase

Following services are available

- Installation & Commissioning
- e-Learning
- Classroom Training
- On-site Training
- Remote Support
- On-site Repair
- Technical Support
- Replacement
